THE PROGRESS NURSERIES, TROY, OHIO

SPRING 1924

Our nursery was established in 1864 and incorporated in 1890. Our president, T. J. Dinsmore, has been actively connected with this business since 1895. He has seen it grow from a few hundred up to more than two hundred thousand dollars per year.

We have large storage cellars, packing houses, etc., and are in position to fill your orders promptly and to give you trees and plants produced and handled by experts, and which contain all their vitality and will grow for you if given ordinary care.

We believe the greatest factor of our success has been "Giving just a little bit more than the customer expects." Our trees are a little bit larger, have all their roots, are a little better graded in every way, have been dug and cared for right so they will grow, and, best of all, you can buy them for just a little less money, where quality is considered. Remember, a bargain is what you get for your money rather than what you pay.

We have cut out all colored plates, all extra's, reduced the size of our catalog, believing that you want a guide as to prices and that you care more to save the amount of these extra's cost rather than to look at pretty pictures and read long descriptions. We have cut everything except the quality of our goods and service.

To our old customers and friends we extend our thanks for helping us build a business and hope our goods and service have already proved all statements made so that we can continue to have your confidence and be worthy of the confidence of such new customers as see fit to send us their orders. We further promise better service and better goods if it is possible to produce them.

GENERAL TERMS

INFORMATION—We are always ready to give you information on the selection of varieties, how to plant and care for your trees, what sizes to use, etc. We also have a landscape department to help solve your problems in that line. They will lay out drives, walks, beds, in fact, give you a regular layout for your grounds if you want it. This is a part of our service that we give with our goods.

It pays to order early because you get a discount and get your order early in the spring at proper time to plant and stand a better chance to have it filled complete as ordered. Nursery stock grows. It is not manufactured and when we are sold out of Baldwin Apples we must buy them from some other nursery if possible or send your order short or use a smaller size, any of which are not satisfactory to you or us either. ORDER EARLY and get YOURS.

HOW TO ORDER—In the catalog you will find an order blank. Use it in making out your order. Fill in the blank spaces, giving name in full, postoffice address, state and number of postoffice box or street number. Also if the place you want goods shipped to is different from your postoffice be sure to write this in also.

Write your letter to us on a separate sheet. This will enable us to handle your order more promptly and accurately.

WHEN TO ORDER AND TERMS—Upon receipt of catalog, fill out your order in full and sent at once. You can save money by sending payment in full for same as follows:

If you send it in before February 1, take off 4 per cent or 4 cents for every dollar you send.

From February 1 to March 1 take off 3 per cent or 3 cents off for every dollar.

After March 1, full amount with order.

Or if you do not want to send all the money with order, send us 25 per cent or one-fourth of amount of money with order and send the balance when you order us to ship same.

You can send remittance by check, money order or registered letter.

SHIPPING—We do not pay express or freight charges. Most shipments should be made by express because we can use heavier stock, pack heavier and get it to you in better condition.

POST PAID BY MAIL—All items priced in mail sizes will be shipped post paid to any address in the United States.

OUR GUARANTEE—We guarantee all goods to reach you in good condition. If the package is broken or appears to be in bad condition, have the express or freight agent write across the receipt given you for payment of express or freight charges these words: "RECEIVED IN BAD CONDITION." Forward this receipt to us with a statement of stock damaged, giving amount of each kind and size, or should there be any mistake in filling your order, write us at once upon receipt of same and we will ship you other stock to replace your losses. This guarantee will not be good unless above conditions are complied with.

NON-WARRANTY—We are ready upon receipt of proper proof to replace free of charge or refund the purchase price for all trees, plants or shrubs that prove untrue to label. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter pertaining to the trees, plants and shrubs we sell.

GIVE THIS CATALOG TO A FRIEND OR NEIGHBOR

who is also interested in Plants, BUT not until after you have sent your order to us. Tell us to whom it has been given and we will add to your order, without cost, a Progress Grape.

OUR IDEAL HOME ORCHARDS

COVERS JUST ONE-HALF ACRE AND COSTS BUT \$65.00

Contains 1367 Trees and Plants

This Orchard has been planned to cover exactly a half acre of land and is 120 feet wide and 178 feet long.

What land owner but can spare this much space to secure fruit of all kinds in plenty, for every day of the year?

If possible, the rows should extend from north to south so that the plants receive the life-giving influence of sunshine during the whole day, and allowed to fall on every side of the plant.

We make the selection of varieties that will be most successful in your section, whether it be Tennessee or Michigan.

ORCHARD NO. 1

12 Apples, 4 to 5 feet high	}
5 Quince, 3 to 4 feet high	
20 Peach, 4 to 5 feet high	
6 Cherry, 4 to 5 feet high	
6 Plum, 4 to 5 feet high	
6 Pear, 4 to 5 feet high	
85 Asparagus	
28 Rhubarb	
125 Raspberries, best Reds	
450 Raspberries, best Blacks	
500 Strawberries	
34 Currants	
34 Gooseberries	
56 Blackberries	

1367 Plants

for

\$65.00

ORCHARD NO. 2

Using 3 to 4 feet Fruit Trees, instead of the 4 to 5 feet, together with all the small fruits in the above offer, the cost will be but \$60.00

ORCHARD NO. 3

If you wish you may have: 30 Apple, 4 to 5 feet; 20 Peach, 4 to 5 feet; 5 Quince, 3 to 4 feet, together with all of the small fruit in above combination offer for \$60.00

Three Opportunities to choose from. You Save Money, Make Money and Get Plenty of Fruit, whichever you select.

**The Progress Nurseries
TROY, OHIO**

APPLES Right at Your Home

They taste better, are always fresh, cheaper and always handy when you want them. "Progress" Apple Trees come to you in fresh condition, strong, well-rooted, transplant successfully and come into bearing quickly.

SUMMER APPLES

BENONI—Pale yellow, marked with dark crimson; juicy, crisp, acid; medium size. A splendid dessert apple. August and September.

CHENANGO—Rather large, oblong, conical; whitish-yellow striped and splashed with light crimson; flesh is white, very tender, with mild, pleasant sub-acid flavor. September and October.

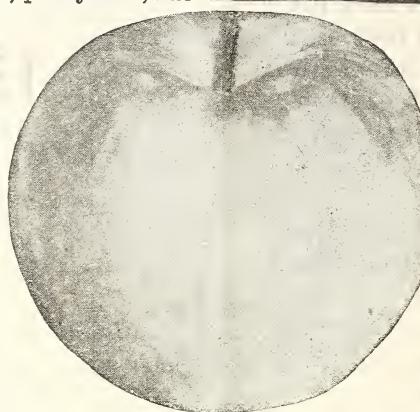

EARLY HARVEST—Medium to large; pale yellow, fine flavor. Tree a moderate, erect grower and a good bearer. July.

GOLDEN SWEET—The best summer sweet apple, possessing all the qualifications for a good baking apple. It's a large handsome yellow apple, sweet and richly flavored. August.

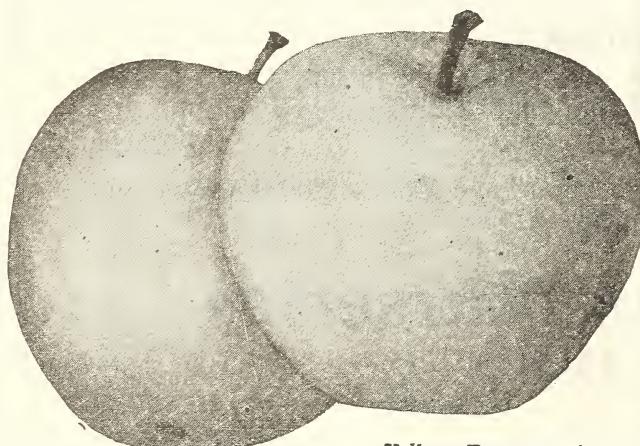

LIVELAND RASPBERRY—A Russian apple of large size, waxy white, marked with crimson; flesh white, is stained with red, tender and sub-acid. Tree vigorous, early bearer. August.

RED ASTRACHAN—Large, roundish; nearly covered with dark crimson; flesh juicy, rich, acid. Cooking and eating variety. Tree a vigorous grower. A good bearer. August.

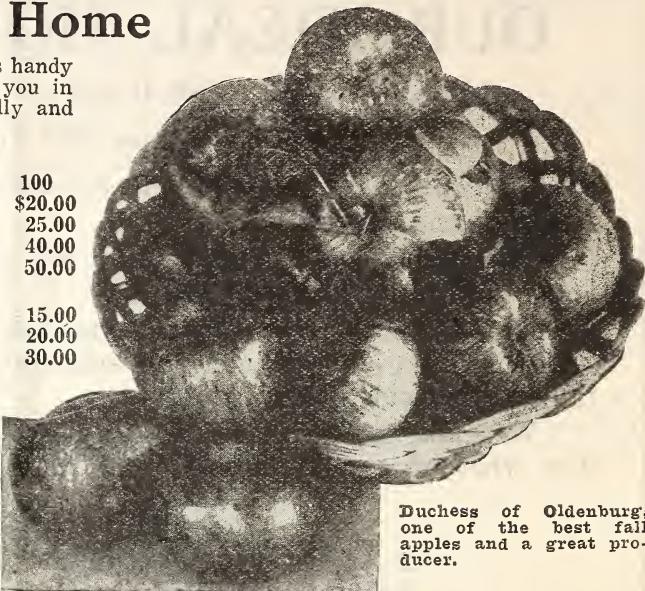

YELLOW TRANSPARENT—Good size; clear white, turning to pale yellow, flavor sub-acid. The ripening season of this is stretched out over a period of about 4 weeks, which combined with its wonderful cooking qualities, makes it a doubly valuable variety for both the home and commercial orchard. July.

Rambo

Yellow Transparent

Duchess of Oldenburg,
one of the best fall
apples and a great pro-
ducer.

FALL APPLES

DUCHESS OF OLDENBURG—Is roundish, streaked red and yellow, the flesh is whitish, juicy; flavor sprightly. The tree is a vigorous grower; is very hardy. September.

FALL PIPPIN—Is very large, roundish, oblong, yellow; flesh tender and delicious. Everybody knows and loves this old favorite.

MAIDEN BLUSH—Medium size, is smooth, beautifully flushed with red on creamy yellow; flesh is tender, of pleasant but not high flavor. Tree a fair grower and productive. September.

RAMBO—Those medium-sized, juicy, striped apples, whose place no other variety could take. They are just as worthy of a prominent place in your orchard and will be just as highly prized by your family.

WESTERN BEAUTY (Summer Rambo)—Large to very large; pale yellow, brightly splashed with red; tender light yellow flesh, juicy and melting. Desirable sort for home and market. September.

WINTER APPLES

AKIN—Medium, round, red; very good; vigorous, hardy, and a high quality. December-April.

ARKANSAS BLACK—A great big dark red apple with delicious juicy flesh. It's a splendid keeper, being covered with a thick tough skin which preserves all that rich goodness stored within as late as April 1st, if kept in an ordinary cellar.

BALDWIN—This good old reliable variety that never disappoints has come down to us from Colonial days. The fruit is of good size, bright red with crisp juicy, slightly tart, richly flavored flesh. A commercial variety on account of its attractive color, fine quality and wonderful keeping properties. November to April.

BANANA—A big smooth, deep yellow apple, slightly blushed. The flesh is solid, juicy and slightly acid. Plant it. November to April.

Rome Beauty

BEN DAVIS—It is the most regular bearing variety grown today. Plant it so that you may have apples when other varieties fail. December to April.

DELAWARE RED—Fruit is medium size; clear white, turning pale yellow, highly prized for cooking and eating; upright grower, bears early and abundantly, hardy. January to May.

DELICIOUS—Large, uniform, oblong, tapering, fine grained, mild and melting with a most delicious aroma. December to April.

FALLAWATER (Tulpehocken) — There's a rich goodness about it that is all its own and reminds one of the bright September days when the sun was putting the last touches of dark red colorings onto those handsome green apples. November to March.

FAMEUSE (Snow Apple)—Medium size; pale greenish yellow, mixed with stripes and splashes of red on shady side; flesh white, tender and juicy, slightly perfumed, sub-acid; Extra good. A fine dessert apple. October to January.

GANO—A fine keeper and shipper; of ordinary quality but an almost sure heavy bearer. Flesh pale yellow, fine grained, slightly perfumed, sub-acid. We recommend it as one of the best for apple butter making. December to May.

GRIME'S GOLDEN—The nearest to perfection of any variety now in general cultivation. In it is combined rich aromatic flavor, excellent culinary qualities, yellow color and a long season of usefulness. It is a wonderful apple. November to January.

HUBBARDSTON—The great in-betweener that ripens just at the time when the early fall varieties are about gone and before the late winter varieties are fully ripe. Both a good dessert and cooking apple. Large yellow overlaid with red.

JONATHAN—One of the very best varieties. Commercially it's the best for the fancy trade during the holiday season. Brilliant red of medium size, flesh white, fine grained, juicy, tender and delightfully

MINKLER—Fruit medium size, color light red; flesh firm, juicy, mild sub-acid. Season, November to April.

MAMMOTH BLACK TWIG—The Mammoth Black Twig is one of our best cookers. It makes a wonderful pie. And then it's good so long, keeping from November to April in the ordinary cellar.

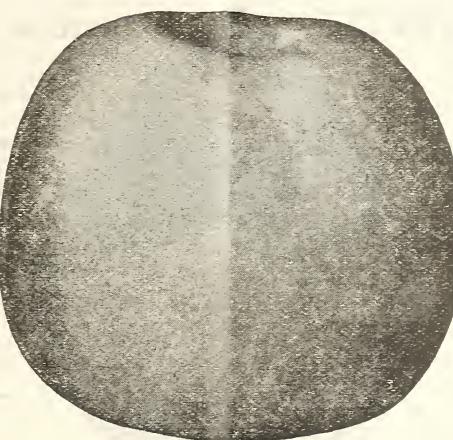

NORTHERN SPY—Large; roundish; slightly conical; sunny side purplish red; flesh cream yellow and tender, with mild rich flavor. Tree is strong, upright grower. December to January.

NORTHWESTERN GREENING—Large; round; green, turning to yellowish-green when ripe; flesh yellow, fine grained and firm. Bears young. Spreading, December to May.

PEWAUKEE—Medium size; yellow, red striped. Flesh white, juicy and slightly acid. In this variety are stored all those fine properties that makes it a favorite in the kitchen. Keeps well in storage. October to February.

ROXBURY RUSSET—Large; roundish; oblate; partly, or wholly covered with rather rough russet or greenish yellow; flesh is greenish-white, rather granular; slightly crisp, with good flavor, rather acid. November to March.

ROME BEAUTY—Large, round, mottled and striped in different shades of red; flesh light yellow, crisp, juicy and slightly acid. Plant it for your own and the coming generation's improvement. November to February.

Grime's Golden—One of our best sellers, the fruit of which is hard to equal, being suitable for all purposes.

RHODE ISLAND GREENING—It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. March to April.

STARK—Large green, streaked with red, apples which in storage begin to ripen in December and keep until April. An apple that will fit your taste.

STAYMAN WINESAP—The Stayman's Winesap is chock full of the acids. Not only that, but the flavor of this full red apple is like concentrated sunshine. November to April.

Delicious Apples

TALMAN SWEET—Medium size, pale yellow, flesh fine grained, white, firm, juicy and very sweet. Every home orchard should contain our three baking apples. The Golden Sweet for summer and early fall baking, the Talman Sweet for early winter and the Winter Paradise for late winter. These three make a great combination. November to January.

VANDEVERE PIPPIN—Fruit large, oblate approaching conic. Yellow, flaked all over with red stripes on sunny side and covered with rough brown dots. Good flavor. September to February.

WAGENER—Medium large; round, oblate; deep red in sun; the flesh is firm, sub-acid and excellent; one of the best for general use. Tree is a quick grower, bears young. December to May.

WEALTHY (Season Early Winter)—This variety is particularly valuable for cold climates because the tree is hardy and the fruit sells well, and is good in quality for either dessert or culinary uses. Fruit large, fine, crisp, tender, very juicy, agreeably sub-acid. Skin is pale yellow, blushed and marked with narrow stripes and splashes of red, deepening to brilliant red. Prevailing effect, bright red.

WINESAP—To have this good old standard red winter at its best you must plant it in your own orchard where you can allow them to remain on the tree to the very last minute in the fall. Stored in the cellar direct from the tree, they mellow up to perfection and retain all of their rich juice. Will keep till March.

WINTER PARADISE—The fine late winter baking variety. Light yellow; flesh is pure white, fine grained, sweet and good. It would be a great mistake not to plant this as well as two other baking varieties. December to March.

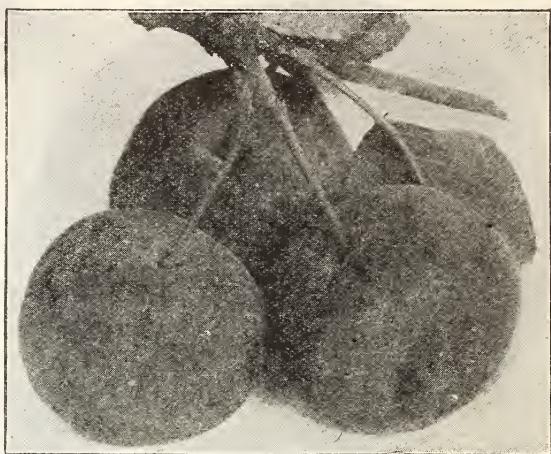

WOLF RIVER—Very large; handsome; red on greenish-yellow skin; flesh white tinged with yellow, very firm, tender, juicy and of good quality; rather acid; market sort. Tree very hardy and productive. September to December.

YORK IMPÉRIAL—If you want a good late winter eating apple that will take you back to your childhood plant the York Imperial. It's a good sized rather flat red and yellow with crisp light yellow flesh full of juice. It simply gets better and better the longer you keep it through the winter.

CRAB APPLES

For Vinegar, Pickles, Jelly, Preserves.
Prices Same as Apples.

Crab apples succeed equally well in all sections and are valuable for cider, preserving and jellies. Every orchard should contain a few, as the trees are

Hyslop Crab Apples

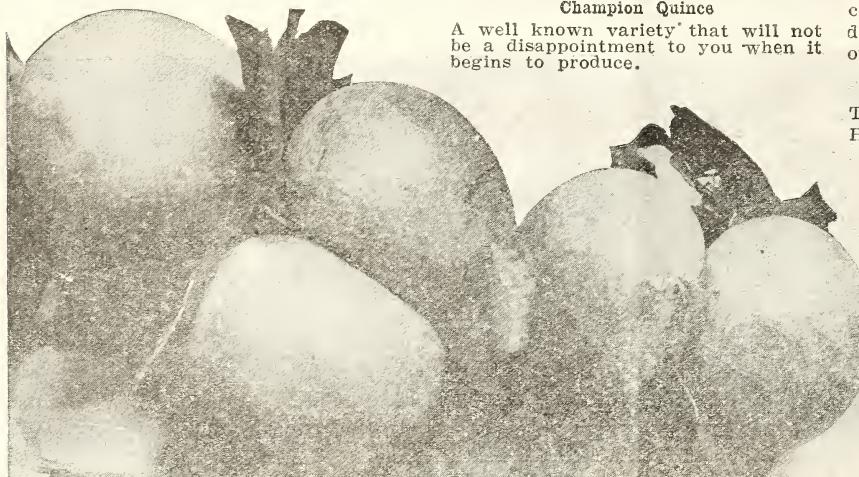

annual bearers, and usually fruit the second year.

GRANT—Good sized yellow striped with red. Overflowing with rich juice that if allowed to go to vinegar is as clear as the purest amber which brings out the hidden flavors of other foods it touches, and adds a rich mellowness all its own. It whets the appetite.

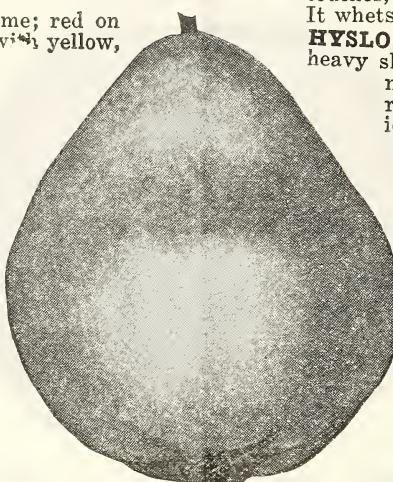

HYSLOP—Nice sized yellow fruit overlaid with heavy shadings of deep crimson and splashes of maroon. Flesh fine grained, yellow and rather tart. Pickled this variety is delicious.

WHITNEY—The largest of the Crab Apple family. A smooth, glossy yellow striped with red. Flesh is juicy and rich, almost sweet. Made into jelly there is a richness that is unsurpassable.

TRANSCENDENT—The variety that makes the best preserving vinegar for putting enough sharpness and acidity to give that crisp, new taste that we all crave.

Wolf River, Winter Apple

Champion Quince

A well known variety that will not be a disappointment to you when it begins to produce.

QUINCES

They make wonderful jellies, and if combined with other fruits, they awaken delightful flavors that cannot be brought out in any other way.

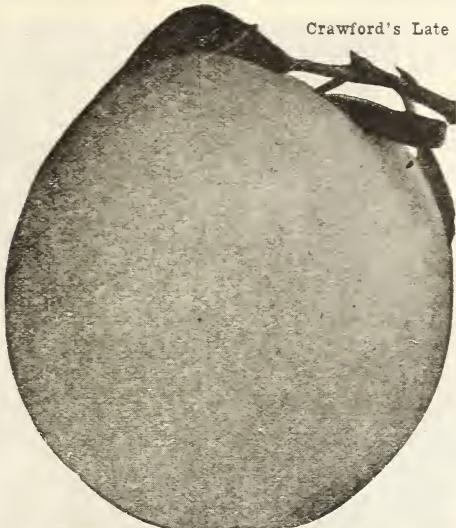

PROGRESS QUINCE TREE PRICES	
Each	
Thrifty 3 to 4 feet.....	\$1.00
Heavy 4 to 5 feet.....	1.25

ANGERS—The original Quince, from which all other varieties spring. The tree is a very thrifty grower and an abundant bearer. The fruit is of good size. Makes excellent jelly.

ORANGE—One of the best for cooking; a valuable, golden yellow Quince, widely planted; flesh firm, of good abundance.

CHAMPION—A prolific and constant bearer, fruit averaging larger than the Orange, more oval in shape, quality equally fine, and a long keeper. Bears extremely young; finest eating and cooking varieties. Great big greenish-yellow pear with russet markings. The flesh is extra juicy. October.

Crawford's Late

PEACHES

The Good Old-Fashioned Flavored Kind

Wherever you have an idle spot of ground on the lawn or orchard that is fifteen feet square, you can plant a "Progress" Peach Tree and the second season afterward pick peaches of the good flavored kind. There's no express charges or dealer's profits to pay on this kind of fruit. You simply go to the tree and pick till you are satisfied. The tree and its fruit are all yours, and best of all, it has the ripe, fresh, rich, juicy, home-grown flavor.

PROGRESS PEACH TREE PRICES, SPRING 1924

	One	25	100
2 to 3 feet high	\$.30	\$6.25	\$20.00
3 to 4 feet high35	7.50	25.00
4 to 5 feet high40	8.75	30.00
5 to 7 feet high50	11.25	40.00

Quantity orders made up of scarce varieties will be charged five cents extra for each peach tree of whatever size.

BEER'S SMOCK—Rather large, creamy-white, with deep crimson blush. Flesh yellow, and a rich quality. A solid well made fruit, making it an extra ordinarily good variety for the commercial orchard. Late September.

BELLE OF GEORGIA—Good sized, rather flat, white with red cheek; flesh white and firm. A wonderful peach if allowed to ripen fully on the tree. August.

CARMEN—Large, round, white with deep blush; flesh tender and juicy. A good commercial variety as the flesh is very firm and the skin tough. If planted in the home orchard and allowed to remain on the tree until fully ripe, there is added an extra flavor. August.

CHAMPION—Large, round, quite regular; color creamy yellow, with red blush; flesh white, with red stains around the pit; flavor delicious, sweet and juicy. The tree is hardy and productive. First of September.

CRAWFORD'S EARLY—Large, yellow, with red cheek, flesh yellow, juicy and sweet; its size and beauty make it very popular. Tree vigorous and productive. First of Sept.

CRAWFORD'S LATE—Large; yellow or greenish-yellow stained with red at pit, melting, vinous and very good. The tree is hardy and productive, usually needs thinning. Sept.

CROSBY—Eaten with cream and sugar, it's a fitting climax for any meal. Medium size, roundish, bright orange with scarlet cheek; flesh soft and yellow. Middle of Sept.

DIAMOND—The finest yellow clingstone. An extremely large peach of wonderful beauty and quality. Fine for canning, preserving and pickling.

LEMON FREE—Equally good for home and commercial orchards. Is of good size, roundish, lemon shape and a lighter yellow, tender, flesh of finest flavor and smoothest texture. September.

MAYFLOWER—The all over red peach, that is so full of rich goodness that you feel like it was made to your own order. July.

MOUNTAIN ROSE—Who can describe the good flavor of a fresh, full sun ripened peach, picked right off the tree? Light yellow, splashed with red; flesh white and when fully ripe it is perfection itself. Early August.

NEW PROLIFIC—A large, yellow peach with rich firm flesh and small pit. September.

OLD MIXON FREE—Large, pale yellow, deep red cheek, white flesh, tender, rich, good. September.

SALWAY—Large cream yellow, juicy, rich and sweet. One of the very best of late varieties. October.

STUMP—Large, white, bright red cheek. Excellent flavor and very productive. End of September.

ST. JOHN—Orange yellow with dark, rich red on sun exposed side; standard sort. August.

WONDERFUL—Large yellow with carmine blush; flesh tender and highly flavored. An excellent keeper. Late September.

ELBERTA—Everybody knows this big, yellow and red peach with its firm, juicy flesh because it's the leading market peach of the country. September.

ENGEL'S MAMMOTH—Picked full ripe from the tree, peeled, halved, and put in rich cane sugar syrup, they will at Christmas time rival fresh peaches from the orchard. Large, roundish oval, yellow with red blush. Early Sept.

FITZGERALD—Large, bright yellow, and of such delicious flavor that whether eaten raw or canned, satisfies.

GOLD DROP—Treat yourself to one of the finest rich, yellow fleshed peaches that grow by planting this variety in your own garden. It will fill the fruit jars. September.

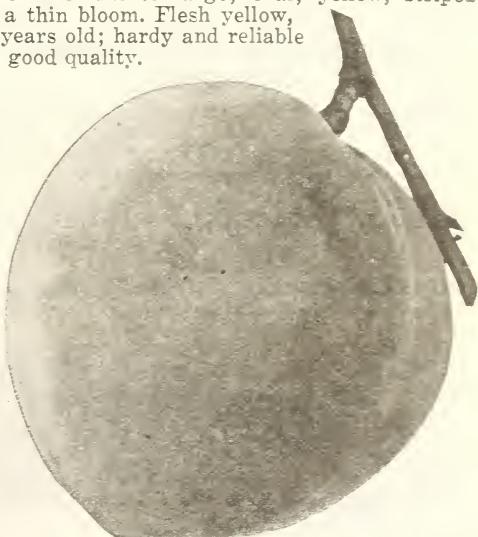

GREENSBORO—The largest and most beautiful colored of the real early varieties. Flesh, white, juicy and good.

HALE—Superior in all ways. Color a beautiful, deep, golden yellow overlaid with bright carmine. Flesh firm and very fine grained. Late August.

HEATH CLING—This is the well known white cling variety so valuable for preserving. A most delicious peach.

HILEY—Large white peach ordinarily ripening August 15th. Flesh tender, of very pleasant flavor. Fruit is handsome in appearance. Trees unusually productive.

KALAMAZOO—Medium to large; oval; yellow, striped with red and a thin bloom. Flesh yellow, bears at two years old; hardy and reliable vinous and of good quality.

Elberta Peach

CHERRIES

THE GREAT AMERICAN PIE AND DESSERT MAKERS

Plant Cherry Trees of any kind or variety on sloping or well drained land and you will succeed in having each season a dependable supply of the best pie and dessert making fruits that enter the kitchen. Our clay land propagated cherries will transplant to your soil so that about the second year afterward you have the fruit coming your way. The blossoms and fruit are distinctive ornaments to the lawn, they make the garden more complete, and planted to the vacant spots in the old orchard or along the fence rows, they return their cost each year without a particle of effort. Sweet or Sour Cherries satisfy the appetite and fill the pies, dessert dishes and the family purse.

PROGRESS PIE CHERRIES, SPRING 1924

One-Year-Old Trees	Each	25	100

PIE AND CANNING CHERRIES

DYEHOUSE—Our earliest ripening pie cherry. Plant it and you'll have your first cherry pie fully a week before any of your neighbors. Early June.

LARGE MONTMORENCY—The all-year round cherry. A prime favorite the country over for canning for winter use. A large, firm, dark red cherry, so delicious in flavor and so satisfying to the taste, that the whole family will like it. Early June.

MAY DUKE—Our very late ripening variety. Plant it and extend your cherry ripening season into August. Medium, dark red, almost black when fully ripe.

MORELLO—Our very late ripening variety. Plant it and extend your cherry ripening season in August. Medium dark red almost black when ripe.

RICHMOND—Medium size, dark red; sprightly acid flavor. This is one of the most valuable cherries for cooking purposes. Tree very productive. Middle of June.

PRESERVING AND DESSERT CHERRIES

BING—Very large, dark brown, almost black; flesh firm, sweet, rich and delicious. July. Flavor of the highest quality. Tree thrifty, upright grower; very hardy and productive. A fine shipping and market variety.

BLACK TARTARIAN — A favorite everywhere. Very large, purplish-black, solid flesh, excellent flavor. Early June.

GOVERNOR WOOD—Ripens in June, and ranks high in general esteem. A large, light

Richmond Cherries

cherry of delicious flavor. Roundish, heart-shaped, shaded with bright red, tender, juicy and rich. Tree vigorous and productive. One of the best sweet cherries.

WINDSOR—Has very fine, firm flesh of high quality; a large, liver-colored cherry. Tree is hardy and prolific.

YELLOW SPANISH—Large, pale yellow, with bright red cheek; flesh is firm, juicy, delicious. Late June.

DINSMORE'S EARLY ASPARAGUS

Extra brittle. Who can describe the delicate flavor of fresh, tender asparagus gathered in early spring? Dinsmore's Asparagus is grown from specially selected seed; it is a choice variety, superior flavor, mild and smooth. When cooked, it retains all that native sweetness. A bed of 100 plants will supply a family of four persons.

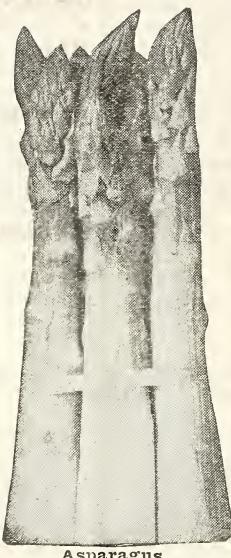

This delicious and healthful vegetable should be in every garden. Nothing can be more easily grown for such little outlay.

Set plants 12 inches apart each way. Spread the roots out and plant with crown 2 inches below the surface of the ground. Top dress annually with well rotted manure.

Prepare the ground by trenching to the depth of two feet, mixing each layer of soil as turned over with two or three inches of well rotted manure.

PRICES OF ASPARAGUS

25 plants	\$1.00
100 plants	\$2.50

Asparagus

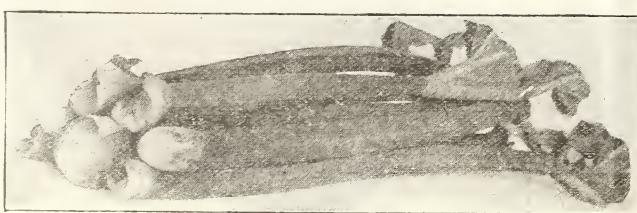

PROGRESS RHUBARB

Should be found in every home garden. Grows almost anywhere and under almost any condition, but the richer the ground, the more tender the growth.

Plant in rows four feet apart with the plants three feet distant. Set so that the crowns are about one inch below the surface. Top dress in the fall with stable manure and fork under in the spring. The great value of Rhubarb has always been its earliness, and it deserves to be ranked among the best early products of the garden.

PRICES OF RHUBARB

Each, 15c; per 10, \$1.25; per 100, \$9.00.

Rhubarb

Progress Plum Trees

Hundreds of years ago these fruits originated themselves in Europe and Japan, but only in recent years has there been determined the soil most favorable to the propagation of all varieties of plums. Trees from our soil seem to grow so easily and come into bearing so soon after transplanting that it is possible for every home site to have an abundance of plums of every variety, if they will only plant "Progress" Plum Trees.

	Each	25
2 to 3 feet high	\$0.60	\$12.50
3 to 4 feet high80	15.00
4 to 5 feet high	1.00	21.25
5 to 7 feet high	1.25	27.25

ABUNDANCE—Of good size; amber with markings of red; juicy, sweet, of good quality. Ripens and colors well after being picked consequently no better for market. August.

ARCTIC—Medium small; very dark purple; pure bloom; semi-cling; flesh greenish yellow, juicy and sweet, with pleasant flavor; for dessert and market. Tree healthy and vigorous, early and abundant bearer.

BRADSHAW—Medium large; purplish-red; free, flesh green and juicy; good shipping qualities. Tree an upright grower, bears regularly; enormous crops. Medium early.

BURBANK—No other plum is so popular all over the country as the Burbank. Like the Abundance it ripens well after picked. Fruit very large, nearly round and bright cherry red. Its deep yellow flesh is sweet, meaty and quite firm. Early September.

GERMAN PRUNE—Medium small; blackish-purple; free flesh, juicy, fine. Tree vigorous and productive.

GERMAN PRUNE—Medium small; blackish-purple; free flesh, juicy, fine. Tree vigorous red; flesh yellow, juicy, pleasant and good. Adheres to the stone. Good market variety.

Tree vigorous and very productive, bearing when quite young.

REINE CLAUDE—Medium; yellow-green; flesh is pale green, juicy, rich and excellent best of dessert sorts. Tree a moderate grower. Mid-August.

WICKSON—Is very large, reddish purple with white bloom, cling; flesh firm and meaty; yellow, rich and aromatic, a market sort. Tree is strong and spreading and bears abundantly and early in most localities. August.

PROGRESS BLACKBERRIES

WILL GROW AND BEAR FRUIT ANYWHERE

"Progress" Blackberries, once planted, will produce great quantities of fruit every year in spite of the customer. Just spare a little space in the garden or along the other side of the lawn fence, and July will be blackberry pie month for you. They are a sort of go-between-crop, since they ripen after the strawberries are gone and way before the pears, plums, apples, and grapes are ready.

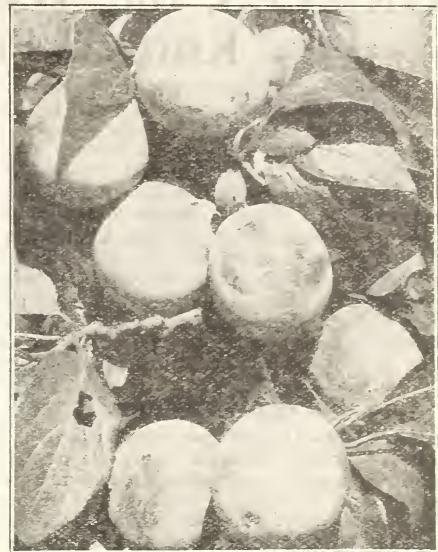

PROGRESS BLACKBERRY PRICES, SPRING, 1924

All varieties named below: 25 for \$1.50, \$5.00 per 100; \$40.00 per 1000.

ELDORADO—The bushes are very hardy and vigorous, enduring the winters of the far Northwest without injury, and their yield is enormous. The berries are large, jet-black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core, and keep for eight or ten days after picking.

EARLY HARVEST—Needs winter protection. Its earliness, combined with good shipping qualities, make it very profitable. Compact dwarf grower, enormous bearer. Fruit medium size, black, of excellent quality.

MERSEREAU—Remarkably strong grower, upright, producing stout, stocky canes. Claimed to be the hardiest blackberry, standing uninjured 20 degrees below zero without protection. An enormous producer of extra size berries, which are brilliant

Lombard

YELLOW EGG—Very large; greenish-yellow; flesh a little coarse but recommended for drying and cooking. Tree a free grower and very productive. Late August.

SHIPPER'S PRIDE—Large; purple; flesh firm, sweet and excellent for shipping and kitchen. Tree hardy and productive. September.

SHROPSHIRE (Damson)—Is small; black or blue; cling flesh is rather coarse; popular in market for kitchen use. Tree is not a rapid grower but fruit grows abundantly in thick clusters. October.

NUT TREES

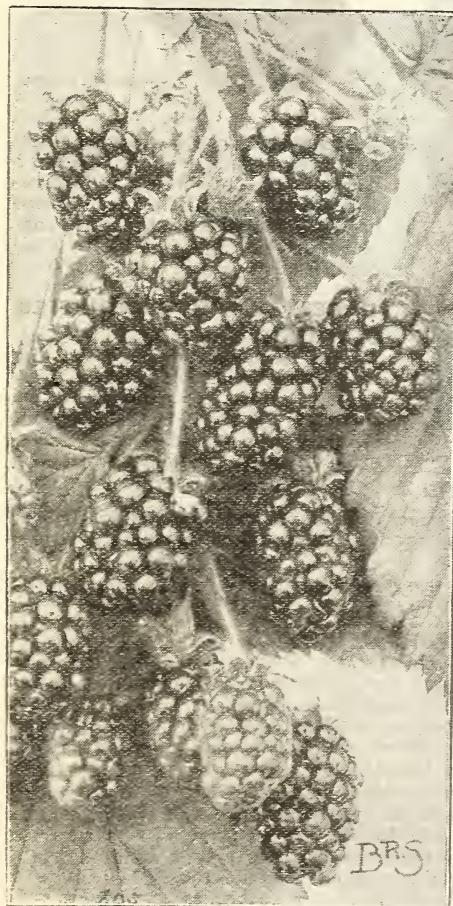

Not only are you each year reaping a large harvest of nuts, but at the same time the trees themselves are growing into many dollars in the form of lumber.

BUTTERNUT—A fine native tree, producing a large, longish nut, highly prized for its sweet, oily nutritious kernel. 3 to 4 feet, each 60c.

CHESTNUT, AMERICAN—Fruit of this well known native tree need hardly be described. We believe it is considered by all to be the best of all nuts, whether native or foreign. The tree itself is unsurpassed in an ornamental way. 4 to 5 ft., each \$1.10.

WALNUT, BLACK—A native tree of large size and majestic form, beautiful foliage. Valuable for its timber, which enters largely into the manufacture of fine furniture and cabinet ware. Tree a rapid grower, producing a large round nut of excellent quality. 3 to 4 ft., each 50c; 4 to 6 feet, 65c.

WALNUT, JAPAN—Perfectly hardy, rapid grower, bearing young and abundantly. Highly prized as an ornamental tree. Nuts resemble butternuts. 3 to 4 ft., each 60c; 4 to 6 ft., each 90c.

Eldorado

GRAPES, the World's Oldest Known Fruit

From time immemorial, even before houses were built, Grapes have been doing a service of food, health and good cheer to people of every race. Grape vineyards were on the mountainsides and filled the valleys when our oldest history was written. They graced the abodes of rich and poor with the same quality of tenderness and blessed everybody with loads of luscious, life-giving and health-preserving fruit, as each season comes around.

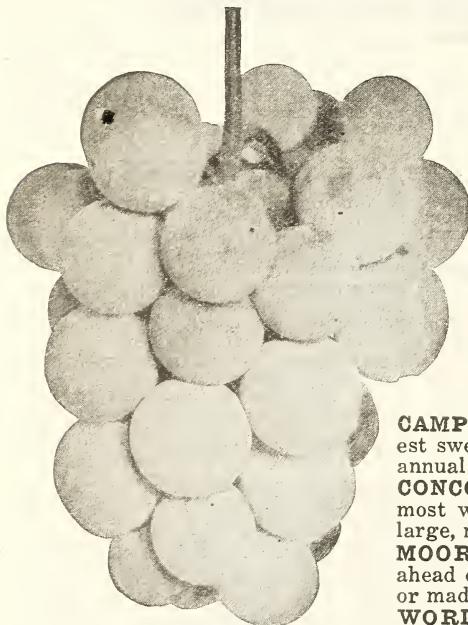

Our offerings of "Progress" Grown Grapes are good, strong, well rooted plants of only the old and well tried varieties that transplant successfully in all the territory where our catalog is sent, and each one of them is assured to produce fruit abundantly each year. For your convenience, we price each variety separately and have made them so low in price and high in quality that every home could and should have its own arbor of "Progress" Sure-to-Bear Grapes.

RED VARIETIES

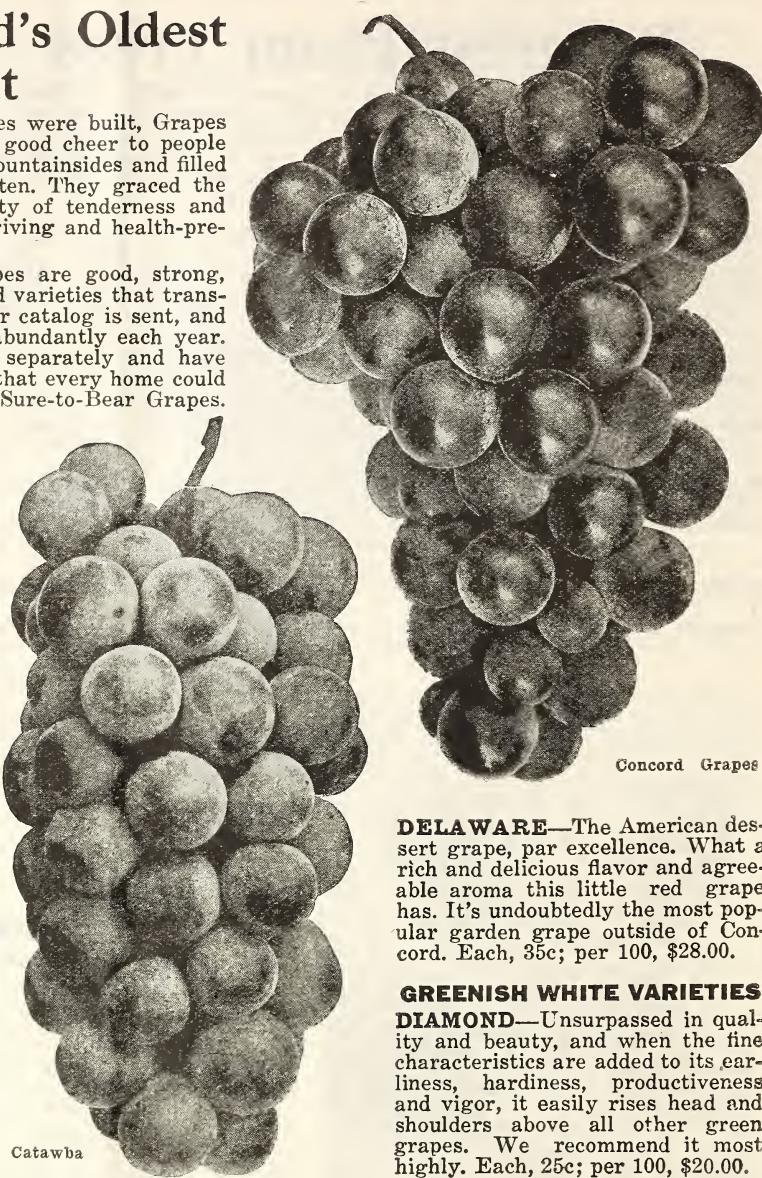

AGAWAM—One of the best known, standard red grapes. Berries quite large, thick skin, compactly set upon large bunch; soft, sweet and sprightly; vinous and aromatic. It ripens about the same time as Concord and if the two juices are blended it adds a more palatable flavor. Another of its commendable properties is that it will keep several weeks after picking and really improves in flavor after 10 to 15 days storage. Each, 25c; per 100, \$20.00.

BRIGHTON—High quality, handsome vigorous grower, producing large size bunches of luscious red berries and adaptable to almost any soil. Each, 35c; per 100, \$28.00.

CATAWBA—Berries round and of good size; skin rather thick, pale red in shade, but a pretty deep red in the sun, covered with a lilac bloom; flesh slightly pulpy, juicy, very sweet. Each, 25c; per 100, \$20.00.

Niagara Grapes

Concord Grapes

POCKLINGTON—Handsome, delicate, golden yellow color and with finely formed bunches, making it very attractive. Sweet, rich and pleasant flavor. Each, 25c; per 100, \$20.00.

NIAGARA—A very vigorous grower, producing great big, well formed bunches. Each, 25c; per 100, \$20.00.

BLACK AND PURPLE GRAPES

CAMPBELL'S EARLY—Great big, fine colored, juicy, black grape full of the richest sweetness. The seeds are very small and part readily from the flesh. A heavy annual bearer and should be included in every collection. 40c each.

CONCORD—The American Grape Juice variety. Eaten from the vine they are the most wholesome and the richest in sugar. Every bunch is completely filled with large, nearly black grapes. Each, 20c; per 100, \$15.00.

MOORE'S EARLY—The best early purplish-black variety, ripening three weeks ahead of Concord. It has a most pleasing taste whether eaten fresh from the vine or made into grape butter. Each, 25c; per 100, \$20.00.

WORDEN—A most meritorious Concord type variety that ripens about a week earlier than its parent, and is just a little larger. Each, 25c; per 100, \$20.00.

PROGRESS PEARS

Every vacant spot in your lawn, garden and orchard can be turned to profit by planting "Progress" Pear Trees. On city properties where space is scarce, you can use Dwarf Trees and set them as close as ten feet apart, and this permits the use of many different varieties on a very small amount of land. For larger areas, we recommend Standard Trees be used and set not closer than twenty feet apart. Pears produced on your home grounds and allowed to become well-ripened, are among the most useful and highly flavored fruits possible of production in your climate. Our pear trees are propagated so there is no sprouting from the roots, and this gives the tree more energy for fruit production, than where they are carelessly propagated.

Progress Standard Pear Tree Prices, Spring of 1924

	Each	25

SUMMER PEARS

BARTLETT—Large, buttery, juicy, high-flavored, great bearer. This sort has been considered one of the choicest canning varieties, as well as a favorite for all other uses. August.

CLAPP—Very large, yellow and dull red, with russet specks, melting, rich. August.

BEURRE D'ANJOU—A large pear with green skin shaded with russet red, flavor rich, perfumed, excellent. One of the best known varieties for late fall and winter. Bears well either as dwarf or standard. October and January.

Bartlett Pears

AUTUMN PEARS

DUCHESS (of Angouleme)—Very large, buttery, rich, juicy, excellent. It succeeds to perfection and is the most popular market variety as a dwarf. October and November.

FLEMISH—Large, juicy, rich, one of the hardiest and the most popular. September and October.

KIEFFER—Its large size, handsome appearance and remarkable keeping and shipping qualities make it very profitable for market. October and November.

SECKEL—Small; yellow, with crimson cheek; flesh melting, sweet and aromatic; most exquisitely flavored pear known. September.

PROGRESS GOOSEBERRIES

The Gooseberry is one of the hardiest types of bush fruits, and is so useful for cooking, whether green or ripe. It requires good rich soil and plenty of moisture.

You will make no mistake by including some Gooseberries in your order. You can seldom buy them on the market.

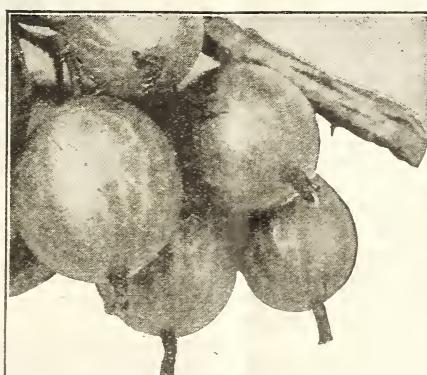

Price of Gooseberries

All Varieties—Each, 40c; per 10, \$3.50; per 100, \$20.00.

DOWNING — Oh, you Downing gooseberry pie. Large, roundish, light green, with distinct veins, skin is smooth, flesh soft, juicy and very fine flavor. Bush vigorous and productive.

HOUGHTON—Fruit medium; roundish, inclined to oval; skin is smooth, pale red. Flesh tender, sweet.

JOSSELYN—Large, smooth, prolific and hardy. Of good quality.

Crafton, Pennsylvania.

I want to commend you on the nice, clean, healthy Shrubs sent on my order. Will buy from you in the future.

H. DIETRICH,
53 Evans Avenue.

Granville, Ohio.

I have cited several parties to your firm and whenever the opportunity comes, will continue to do so. Everything I ever purchased of you have been perfectly satisfactory. With best wishes and a prosperous New Year to you.

CHAS. DEEDS,

PROGRESS HORSE RADISH

Produces quick growth of large, tender crisp roots which are as tender as turnip. Everybody loves "Progress" Horse Radish, because a splash of it gives such an appetizing flavor to meats, beans and potatoes. A fine appetite, good digestion, a warmed up system and a lively step results from the proper and frequent use. Break up the bad cold and drive away asthma with its "Oh Boy! Effect" on the nose, throat and head. 25 for 75c; 100 for \$2.00; 1000 for \$15.00.

RUSSIAN MULBERRY

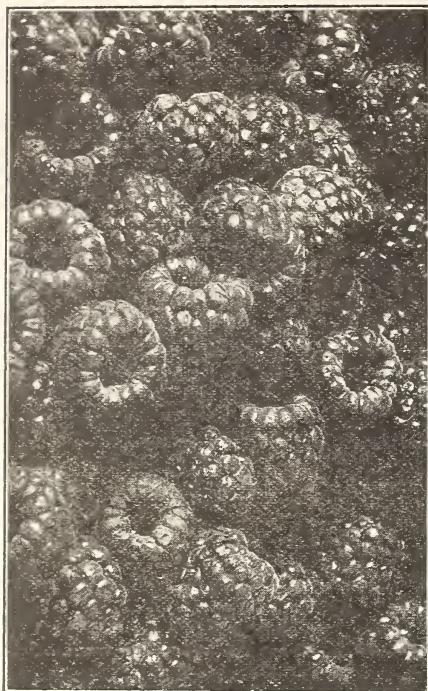

RUSSIAN MULBERRY PRICES

	Each	10
4 to 5 foot trees	.50c	\$4.00
5 to 6 foot trees	.60c	5.00

No other substance in the world makes such a healthful and appetizing meal for song-birds of every color, as do Russian Mulberries. While they are visiting you and partaking of your Mulberries they will eat thousands of destructive insects from your garden, lawn, orchard and grain fields.

A few Mulberries should be planted in every poultry yard as its long continuing fruit season supplies food that is stimulating as well as tonic against most of the diseases to which chickens are subject.

For thousands of years, the Mulberry has been the one hardy tree that has given its fruit and shade for the life and comfort of man and his bird friends. Does not this time proven experiment prove it worthy for planting about your home grounds?

Columbian Raspberries

"Progress" Raspberry Plants

THEY PRODUCE BIG CROPS

The mere mention of Raspberries brings a vision of lusciousness that appeals to the taste of everyone. Pies, jellies, sweet juices, preserves and what not. Every home should have a few of them with the assurance that they will bear large crops of rich berries annually.

There is room in every garden for from 25 to 100 Raspberry bushes which will furnish them in abundance in the fruiting season for table use and also a surplus for putting up for winter.

If you want to make some quick profits, plant more than what your own needs will require and market them. At the high prices there is a big reward for anyone who plants them.

CARDINAL—The fruit is large and of excellent flavor. The canes are of very sturdy growth, and annually bear great loads of berries. This is the best of all purple berries. \$1.00 per 25; \$3.50 per 100; \$25.00 per 1000.

COLUMBIAN—A strong growing plant that produces fine dark purple berries that are large, firm, and sweetly flavored. It has proved through the test of many years that it is unsurpassed as a producer of berries that are most desirable for jams or jellies or for eating fresh during the fruiting season. Include some of them in your planting this year, you will be richly rewarded. \$1.50 per 25; \$4.50 per 100; \$30.00 per 1,000.

CUTHBERT—Produces fine crops of large, conical, deep red berries that are sweet, rich, highly flavored and as beautiful as strawberries. \$1.25 per 25; \$4.00 per 100; \$30.00 per 1000.

CUMBERLAND—Largest of all black caps. Coal black berries, very firm and quality of the very best; excellent shipper. Bush a strong grower, stocky and unusually prolific. Mid-season. \$1.00 per 25; \$3.00 per 100; \$22.50 per 1000.

GOLDEN QUEEN—A great big golden yellow berry that is wonderfully productive. One of the finest for jams and jellies. \$3.00 per 25.

HAYMAKER—Large purplish berries of the highest quality. They ripen late and last a long time. A most delicious berry that makes the finest of jams and jellies. \$1.50 per 25; \$4.50 per 100; \$30.00 per 1000.

IMPROVED GREGG—Its large, showy berries produce in great abundance, the canes are hardy and vigorous, making it among the best. It is adapted to all soils. Shining black. \$1.25 per 25; \$4.00 per 100; \$25.00 per 1000.

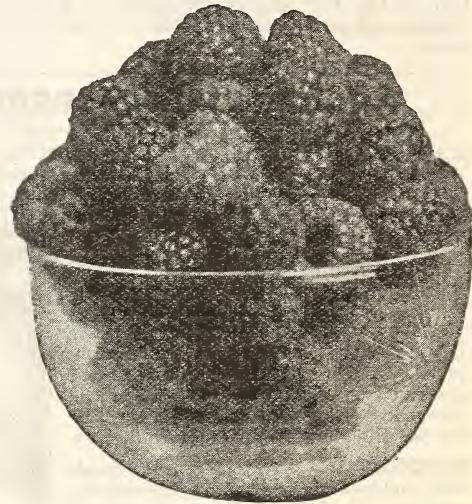

KANSAS—Very large; black; a berry of splendid quality for general use and popular on the market. In many sections it is the leading sort for extensive planting on account of its vigorous and healthy growth, and prolific bearing. \$1.00 per 25; \$3.00 per 100; \$22.50 per 1000.

LOUDON—Large; bright red or crimson; quality excellent for both dessert and market; stands shipping well and is very hardy. Mid-season. \$1.50 per 25; \$4.50 per 100.

PLUM FARMER—A very profitable early variety whose crop matures over a very short period. Jet black, thick meated and firm. In them nature stores up the elements that put pep, vigor and vim in all that eat them. the valuable mineral salts and other qualities that restore muscular vitality and refresh weary nerve cells. \$1.25 per 25; \$4.00 per 100; \$30.00 per 1,000.

PRIDE OF OHIO—A fine new variety whose popularity is going to surpass our old favorites. A deep black berry, firm, sweet and very solid. Its most marked quality is that its fruiting season is spread out over a period of from a week to ten days longer than any other variety. The plant is a vigorous grower, throwing up stout, stocky well branched canes that produce immense crops of fine fruit. \$1.25 per 25; \$4.00 per 100; \$30.00 per 1000.

ST. REGIS EVERBEARING—Earliest of all; wonderfully prolific, it equals most black cap varieties; gives a crop of fruit all summer and autumn, fruiting on old canes until late in August, when berries begin to ripen on young

Improved Gregg Raspberries

canes. Berries bright crimson, of large size and surpassing quality; canes stocky; strong growth with abundance of dark green, leathery leaves. It succeeds upon all soils, whether light and sandy or cold heavy clay, and canes are absolutely hardy. \$1.50 per 25; \$5.00 per 100; \$35 per 1000.

EXPRESS DELIVERY LIMITS

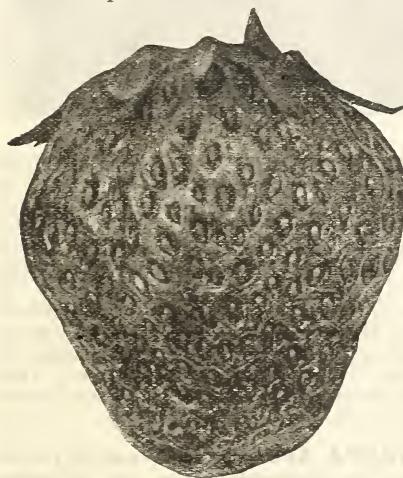

Some of our customers who live just outside of the Free Express Delivery limits of their city may specify some residence or store within such limits where the Express Company can make delivery for them. This insures prompt delivery and saves time and money for the customer. It is reported that some of our customers have been compelled to pay exorbitant charges for such Outside Delivery.

"PROGRESS" Strawberries

Stomach satisfaction, bright rosy cheeks and good health come to those who have a home planting of "Progress" Strawberries. Only a couple hundred of plants are required to supply the berries and add to these a little cream and sugar and you have at hand the materials for a king's dinner. Prepare the jams from the spring bearing varieties and have a couple hundred plants of the Everbearing kinds for a steady supply of berries through the summer and fall

months, till the coming of freezing weather. The perfect and imperfect types should be mixed for successful fruiting and unless you specify what varieties of Imperfects are desired, we will take the liberty of making the mixture so the results will be satisfactory.

Set plants 15 inches apart in rows that are about three feet apart and always keep them well cultivated and clear of grass and weeds. If the soil about the plants and between the rows is covered with two inches of well-rotted manure, the plant growth and fruit production will be even more gratifying.

Aroma Strawberry

POKOMOKE (Per.)—When left to fully ripen on the plant this variety is so sweet that very little sugar is required. Large crimson, with firm flesh. An especially fine canning variety. The plants are strong growers and very productive. Medium season.

EVERBEARING VARIETIES

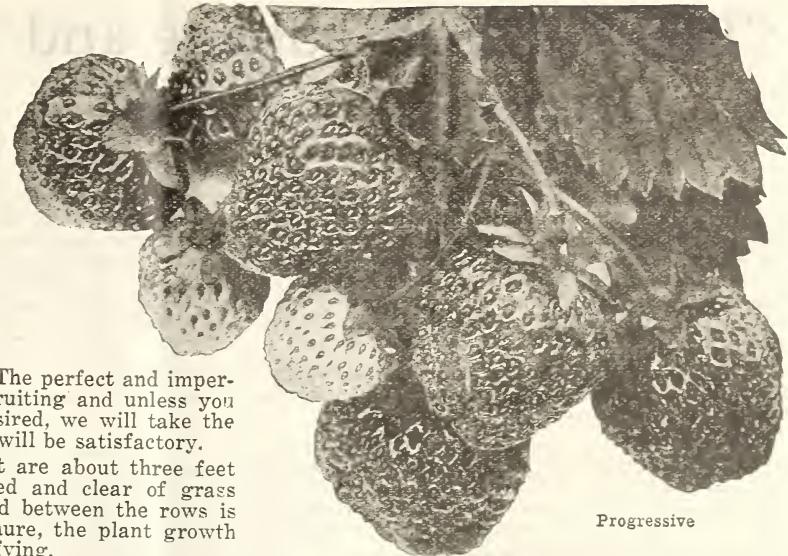

As to Everbearing Strawberries, there are just two good varieties, the Progressive and the Superb. In our own testing the Progressive has proven itself to be much the better, producing great big crops of deep crimson berries, that have all the fine qualities of the spring varieties, during August, September and October.

PROGRESS CURRANTS

PERFECTION—This is one of the most productive Currants we have ever known, and in quality it is superior to anything in the market, being of a rich, mild sub-acid flavor, and having plenty of pulp, with few seeds. In color it is a beautiful bright red. This is one of the very best currants for the market grower, as it presents a fine appearance when displayed and always brings the highest prices.

CHEERY—All the name implies. It's a great big, bright red, richly flavored variety that makes one of the clearest and most delicately flavored jellies.

FAY'S PROLIFIC—Produces large bunches of deep red berries of uniform size and of the finest quality. We have some very fine plants of

SPRING VARIETIES

AROMA (Per.)—Plants are very strong, vigorous and yield immense crops of large, round, dark, glossy red berries of excellent quality and high flavor. It's a fruit jar filler. Late.

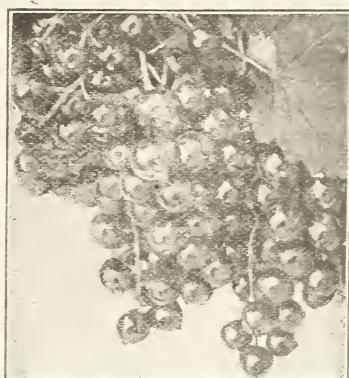

DUNLAP (Per.)—The leader of them all, plant it in your garden and have real strawberries instead of the kind that set your teeth on edge, that you get from your grocer. It's an attractive, deep red berry of the finest quality that bears very early in the season and continues nearly a month.

GANDY (Per.)—Plants yield great big crops of juicy berries, dark red and smooth. It is one of the solidest berries which make it an extremely good shipper. It is just the variety to plant with the Dunlap, as it begins fruiting just about the time the Dunlap is through, thus extending your fresh strawberry eating season by about ten days.

GLEN MARY (Per.)—Mid-season. Unexcelled as a long distance shipper and one of the best for our state, as it resists dry weather admirably. A heavy bearer of large delicious fruits.

HAVERLAND (Imper.)—Early and one of the most valuable market sorts. Very productive, of medium to large, conical berries that are smooth, regular, mildly sub-acid. Medium early.

WARFIELD (Imper.)—If you wish to enjoy a real treat include some Warfield in your planting. Beauty, firmness, earliness, productiveness, vigor, make it one of the most popular berries grown. Medium early.

"PROGRESS" Shade and Ornamental Trees

"Songs and poems from such as me,
But only God can make a tree."

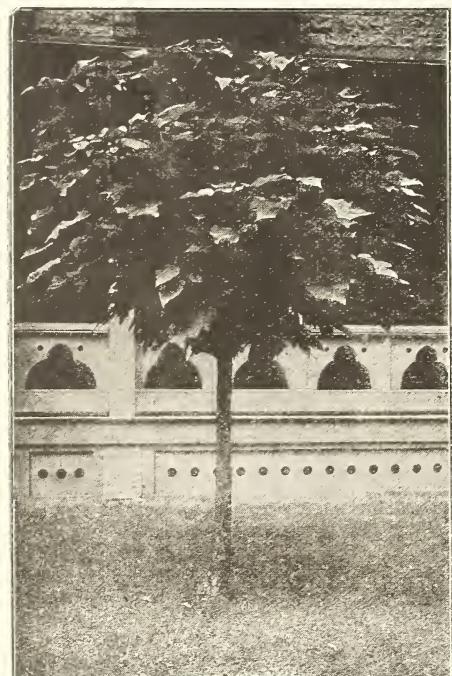

The wonderfully practical and sentimental value of trees of every kind, have prompted almost every American man, woman and child to "Plan to Plant Another Tree" during the Spring of 1924. They protect us from the cold of winter and the heat of summer. They provide the cooling shade where the young, sick and aged of our households may pass the awfully hot days of our mid-summers in comparative comfort. On the hottest day, lay your hand or recline your body against the trunk of a thrifty tree, and your overheated blood will be quickly cooled.

What wonderful beauty in the Elms, Sycamores and Maples that ornament the grounds about home and line the roads, streets and avenues "where the world goes by!"

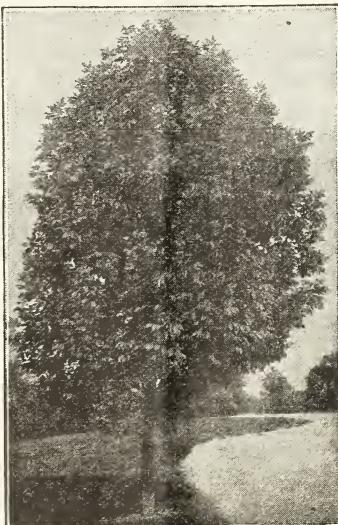

Some trees are suited for one purpose and some for another, but in our wide collection, we produce and offer select, high-grade trees of every age, size and shape, for every soil, place and purpose. If in doubt as to what kind will serve your purpose best, write us and we will help you decide. "Progress" Trees are made best, transplant best and succeed best.

ASH, AMERICAN WHITE — The well known native tree, is very straight with broad round head and dense foliage. Its trunk of gray, the easy sweep of its branches, the slightly drooping poise of its soft green foliage make it most desirable for planting as a single shade tree or for avenue planting. Six feet, 75c each; 8 ft., \$1.00; 10 ft., \$1.50.

BIRCH, EUROPEAN WHITE — Quite erect when young, branches begin to droop gracefully with age. Its bark is snowy white and very effective in landscape. Six feet, \$2.00 each; 8 ft., \$2.50 each.

Catalpa Bungei

American Ash

Dogwood

CATALPA BUNGEI (Umbrella Catalpa) —Grafted on stems 6 to 8 feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy and flourishes in almost all soils and climates. Its leaves are large and glossy, heart-shaped, deep green and lie like shingles on a roof. It always makes a globular, symmetrical head which makes it very unique. An indispensable tree for the ornamentation of lawns, drives, parks and cemeteries. One year heads, \$2.00 each; two year heads, \$2.50 each.

CATALPA SPECIOSA (Western Catalpa) —We recommend this for planting where quick shade is desired as it is a rapid grower and very shapely, and also a long lived tree which is not the case with other quick growing trees. Six feet, 65c each; 8 ft., 85c; 10 ft., \$1.00.

CRAB, BECHTEL'S FLOWERING—Grows into a hardy, handsome little tree. In early spring it is simply covered with bloom which at a distance resembles dainty little roses of a delicate pink. It blooms quite young. Is very fragrant, being the only sweet-scented double flowering crab. Two feet, 75c each; 3 ft., \$1.00.

DOGWOOD, RED FLOWERING—Flowers red, 3 to 3½ inches in diameter, produced in spring before leaves appear; very abundant, showy and durable. Foliage grayish green, glossy and handsome, in the autumn turns to deep red, making the tree one of the most beautiful at that season. Three feet, \$1.75 each.

DOGWOOD, WHITE FLOWERING—In early spring the great white blossoms appear before the leaves are out, transforming the tree into one huge bouquet at which season it is the glory of any planting, challenging attention and admiration of all. Three feet, 75c each; 4 ft., \$1.00.

ELM, AMERICAN—One of the finest of our native trees, of lofty growth and graceful, drooping branches. At home wherever planted. A tree interwoven into American history. It was under its branches at Cambridge, bridge, Mass., that George Washington first drew his sword in defense of American Independence. Six feet, 75c each; 8 ft., 90c; 10 ft., \$1.25 each; 1½ to 2 inch diameter, \$2.00; 2 to 2½ in., \$2.50.

Norway Maple

HACKBERRY—A very rare native tree, with numerous slender branches, which spread out horizontally. The bark is thick and rough. The leaves are about the size and form of those of the apple, more pointed and bright green. Desirable for lawn planting. Six feet, \$1.00 each; 8 ft., \$1.25; 10 ft., \$1.75.

HERCULES CLUB (*Aralia Spinosa*) — Vigorous in growth, making a large clump from suckers freely produced. In August it bears large clusters of white flowers. It is used for tropical effects in connection with other shrubs and low trees. Four feet, 60c each; 8 ft., \$1.00.

HORSE CHESTNUT—They have an elegant pyramidal habit; leaves are deeply lobed and showy, upright panicles of white or red flowers. Hardy, vigorous and free from insects; among the first of the trees to unfold their leaves in the spring. Three feet, \$1.25 each; 4 ft., \$1.50; 5 ft., \$2.00.

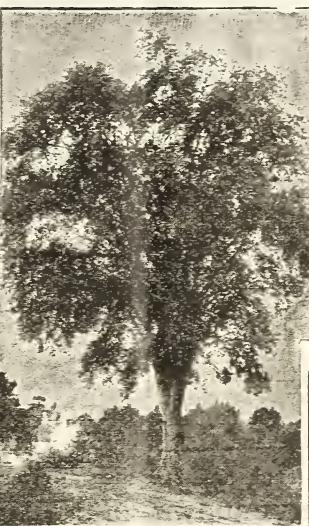

LINDEN, AMERICAN—A stately tree, the branches inclined to spread and develop into an ample, rounded head, where the tree grows in the open. Its freedom from insect pests, handsome foliage and large and fragrant flowers make it a very desirable ornamental tree. Six feet, \$1.75; 8 ft., \$2.50; 10 ft., \$3.00.

LINDEN, EUROPEAN—Excellent broad-leaved variety, growing into a noble tree, 60 to 80 feet high. Flowers in June. Six feet, \$1.75; 8 feet, \$2.50; 10 ft., \$3.00.

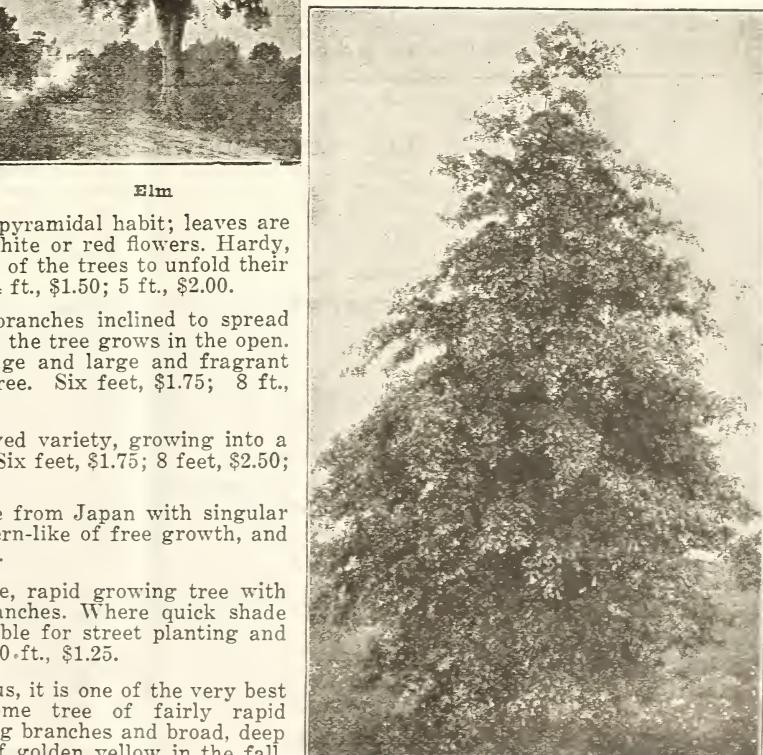

MAIDEN HAIR TREE—A rare, elegant tree from Japan with singular foliage unlike that of any other tree; almost fern-like of free growth, and every way desirable. Six feet, \$1.25; 8 ft., \$2.00.

MAPLE, ASH LEAVED (*Box Elder*)—A fine, rapid growing tree with light green ash-like foliage and spreading branches. Where quick shade is desired no other tree is better fitted. Desirable for street planting and windbreaks. Six feet, 75c each; 8 ft., \$1.00; 10 ft., \$1.25.

MAPLE, NORWAY—Sturdy, compact, vigorous, it is one of the very best trees for lawns, parks and gardens. A handsome tree of fairly rapid growth, forming a dense, rounded head of strong branches and broad, deep green leaves, which turn to beautiful shades of golden yellow in the fall. Six feet, \$1.75 each; 8 ft., \$2.00; 10 ft., \$2.50.

Elm

Pin Oak

MAPLE, SCHWEDLERI—The same fine growth and habit as the Norway except that the leaves come out bright crimson and gradually change to dark green during the summer. Six ft., \$3.00 each; 8 ft., \$3.50.

MAPLE, SILVER-LEAVED (Soft Maple)—The first of our native trees to accept the challenge of March that spring has come, its flower buds being ready to push out at the slightest provocation. One of the most rapid growing trees, making it very desirable for street planting, especially where new additions are being taken into cities. Six feet, 60c each; 8 ft., 75c; 10 ft., \$1.00; 1½ to 2 in. diameter, \$1.50 each; 2 to 2½ in., \$2.50; 2½ to 3 in., \$3.50.

MAPLE, SUGAR OR ROCK—One of the most desirable of ornamental trees being stately in growth, of fine form and beautiful foliage. Especially valuable for avenue planting. Six feet, \$1.75 each; 8 ft., \$2.00.

MAPLE, WIER'S CUT-LEAVED—Remarkable and beautifully dissected foliage. Of rapid growth; shoots slender and drooping. Should be in every collection. While it makes a large tree if undisturbed, it will bear any amount of pruning and may be easily adapted to small lawns. Six feet, 75c each; 8 ft., \$1.00; 10 ft., \$1.35.

OAK, BURR OR MOSSY CUP—Of massive open growth, heavy leaves and deeply corrugated bark. Five feet, \$2.00 each; 6 ft., \$2.50.

OAK PIN—Peculiarly handsome tree used for avenues. Leaves deep green turning to red during fall, finely divided. Drooping branches. Grows rapidly and prefers somewhat damp soil. Five feet, \$2.00 each; 6 ft., \$2.50; 8 ft., \$2.75; 10 ft., \$3.00.

OAK, WHITE—This is one of the finest native trees we have and grows to majestic proportions. One of them will last through many generations and stand as a monument to the planter. Six feet, \$2.50 each; 8 ft., \$2.75; 10 ft., \$3.00 each.

POPLAR, CAROLINA (*Populus*)—While we do not recommend the extensive planting of Carolina Poplar, it is very desirable where quick shade is needed. However, if it is well pruned back the first few seasons, it makes a strong, durable growth. Six feet, 50c each; 8 ft., 75c each.

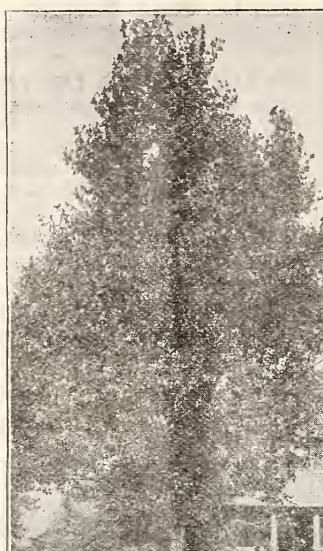

POPLAR, LOMBARDY (*Populus Fastigiata*)—One of the most picturesque leaves are glossy green above and silvery beneath. A favorite in landscape work for breaking up the monotony of low, round top trees. Six feet, 50c each; 8 ft., 75c; 10 ft., 90c.

RED BUD—A small growing tree of irregular form and heart-shaped leaves, covered with delicate pink blossoms in early spring before the leaves appear; very ornamental. Three feet, 75c each; 4 feet, \$1.00.

STRAWBERRY TREE — A beautiful little tree, whose fruit and foliage assumes in the fall the most intense crimson color. One of the most important of recent additions to the list of American shrubs. Four feet, \$1.00 each; 5 ft., \$1.25.

SYCAMORE, AMERICAN (*Plane*) (*Buttonwood*)—Is broad, spreading, round-topped, massive and picturesque, often 100 to 120 feet high. Very effective in winter when its branches show almost white as a birch's. Six feet, 75c each; 8 ft., \$1.00; 10 ft., \$1.25.

SYCAMORE, EUROPEAN (*The Plane Tree*)—In every city and about every home there are places where only the hardiest kinds of trees can survive the rough treatment they receive. Passersby kick them, cut and drive against them and the stony, water-proof curbing about them prevents the roots from spreading in their natural way, while their needed water is hurried away from them, when everybody knows that moisture is one of the first es-

Carolina Poplar

sentials to tree life and their growth. They are improved Sycamores, and who but knows the white bark, the spreading branches and long life of the hardy Sycamore? It has been immortalized in verse and song for those whose hearts go back to the old and pleasing scenes.

"Through the Sycamores the candle-lights are gleaming,
On the banks of the Wabash far away."

Six feet, \$1.00 each; 8 ft., \$1.25; 10 ft., \$1.50; 1½ to 2 in. diameter, \$2.00.

TULIP TREE—A tall magnificent native tree, of rapid pyramidal growth. Valued for its smooth, clean bark and handsome green foliage. Its large, greenish-yellow tulip shaped flowers appear in early June. A very desirable shade tree. Four feet, \$1.00 each; 5 ft., \$1.25; 6 ft., \$1.50; 8 ft., \$2.00 each.

WILLOW, GOLDEN BARKED—A distinct variety, with golden bark of high color, very conspicuous in winter. Valuable in bush form, for use in mass planting. Six feet, 50c each; 8 ft., \$1.00; 10 ft., \$1.50.

WILLOW, LAUREL-LEAVED—Rapid growing tree notable for shining, dark green foliage. May be grown as an individual specimen, or is useful for hedges or screens when height is desired. Does well at the seashore. Six feet, 50c each; 8 ft., 75c.

WILLOW, REGALS—A large tree, with short and thick trunk, branches yellowish brown; leaves ashy gray, and silky throughout, giving a white appearance to the whole tree. Six feet, 75c each; 8 ft., \$1.00.

Weeping Trees

BIRCH, CUT-LEAVED WEEPING—Of wonderful grace and beauty. Tall, vigorous, with slender, drooping branches; foliage colors brilliantly in fall, and its bare

white trunk and branches are very beautiful in winter. Six feet, \$3.00 each.

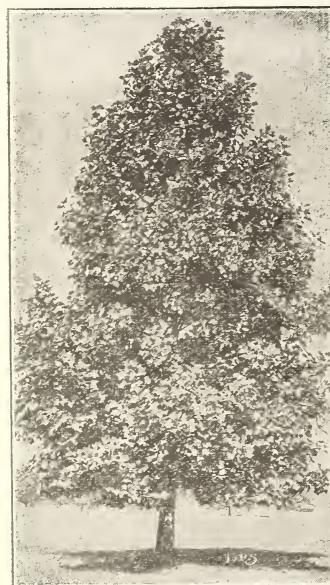

ELM, CAMPERDOWN—One of the most distinct and picturesque of all of our weeping trees. Grows well in most any climate, is of fine and notable habit, the strong branches often sweeping out horizontally several feet before they curve downward, making a broad, handsome head. One year, 6 ft., \$3.00 each.

MULBERRY, TEAS' WEEPING—The most graceful and hardy weeping tree in existence. It forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground. In light, airy gracefulness, delicacy of form and motion, it is without a rival. It has a beautiful foliage, is hardy, safe and easy to transplant. Seven feet, \$3.00 each.

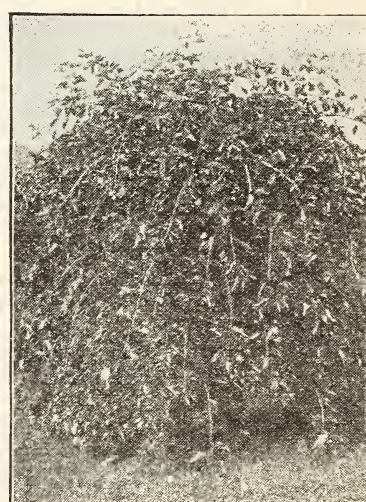

WILLOW, BABYLONICA—Well known, large Weeping Willow. Is most valuable as a single specimen to contrast with upright trees. Six feet, 75c each.

WILLOW, THURLOW'S—Spreading, drooping tree, similar to the Babylonica. Eight feet, 75c each.

WILLOW, WISCONSIN WEEPING—A variety resembling the Babylonian Willow, except that it is more hardy. Six feet, 75c each; 8 ft., \$1.00.

Tulip Tree

Weeping Mulberry

CLIMBING VINES

That Keep Out the Sun's Glare, but Let in Plenty of Fresh Air

AMPELOPSIS—For covering walls, fences, trees and rocks.

—A. Veitchii (Boston Ivy)—Beautifully hardy Japanese species. One of the finest climbers for covering walls as it clings firmly to the smoothest surface covering it evenly with overlapping leaves which form a perfect mass of foliage. The color is a fresh deep green in summer, changing to bright shades of crimson and yellow in autumn. 40c each.

—A. Englemanii—Excellent plant for covering trees, rocky slopes, walls and decaying buildings. Shorter joints and more rapid growth than the Quinquefolia. 40c each.

—A. Quinquefolia (American Ivy)—The well known native, with five-parted leaves that change to rich scarlet in fall. Berries black-blue. Entirely hardy anywhere; quick growing; usually requires some support on walls, although it climbs by means of tendrils and clings to brick and stone surfaces. 40c each.

—English Ivy—Its broad glossy dark leaves retain their beauty all winter if planted on the northern side of buildings, away from the sun. It is hardy here. 75c each.

CLEMATIS (For Porch Decoration)—Of all the vines used for either shade or decoration, none can compare with the clematis in its many and various forms. As a climber for the veranda, a screen for fences, for pillars, along garden walks, for training on walls or arbors, in masses on rockwork it has no rival among the strong-growing blossoming plants. Their delight is in rich soil and a sunny situation, and they are perfectly hardy. They should be well mulched with rotten manure in winter.

—C. paniculata—No better vine for porch decoration as it is a rampant grower, giving abundant shade. It is literally covered with small star-like, white, sweet scented flowers in August. A clean growing vine that does not dirty up the porch. You'll like it. 40c each.

—C. Ramona—A strong, rampant grower and a true perpetual bloomer, flowers appearing on last year's growth and on new shoots giving an abundance of bloom all through the season. Color, deep rich lavender. Each, \$1.50.

—C. Henryi—Creamy white; large and of fine shape, a free grower and bloomer. \$1.50 each.

—C. Jackmanii—Large intense violet flowers, very free. One of the popular varieties. Each, \$1.50.

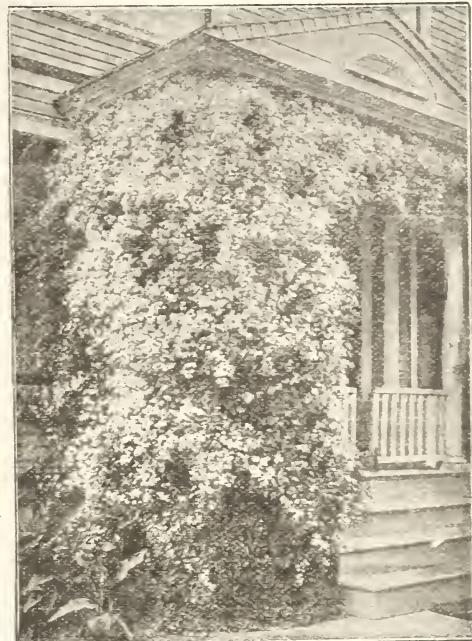

HONEYSUCKLE (For Porches, Trellises and Steep Hill Slopes)—H. Hall's Japan—The best growing Honeysuckle. Its glossy green leaves persist all winter. Flowers white and buff with entrancing fragrance, borne in profusion in June and occasionally till frost. Fine plants. 35c each.

—Chinese Twining—Twists, twines and blooms everywhere. 35c each.

SCARLET TRUMPET—Red, fragrant bloom and winds about the porch. 35c each.

WISTARIA—W. Purple (For Pergolas, Trellises and Porch Decoration)—A very desirable vine, of rapid growth and a free bloomer. Flowers, pale blue. 75c each.

—W. White—Of same habit as above except that the flowers are snow white. 75c each.

Clematis Paniculata

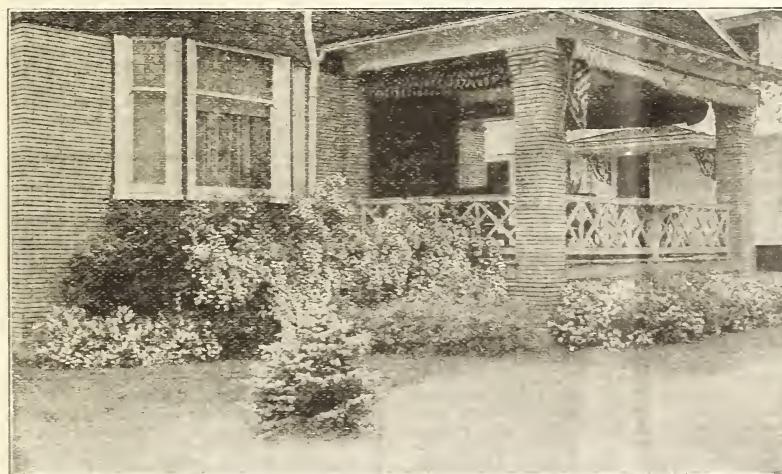

MATRIMONY VINE—Use anywhere that a heavy vine growth is desired. Purple flowers and showy fruit. Sometimes used as a shrub as it takes on a very formal growth if kept pruned back. 35c each.

“PROGRESS” PLANTS FOR THE YARD

Should not the grounds receive the same attention to make them beautiful as the house itself? The furniture, carpets and pictures for the grounds come in the form of flowers, shrubbery, and well kept lawns. Just as proper taste should be used in the selection and placing of adornments for the interior of the home, so the same taste must be used in the selection and placing of flowers and shrubbery, so that beauty and harmony will be the result. It matters not whether the house is a simple cottage, or a magnificent structure, it still requires the personal touch to the outlying grounds to really convert that house into a home.

ALL MAIL-SIZE SHUBBS QUOTED PARCEL POSTPAID TO CUSTOMER

ALMONDS—One of the most profuse of the early bloomers. Dwarf, bushy and compact. Is in full bloom before the leaves are out in the early spring, at which time it is completely covered with beautiful little rose-like flowers that snuggle tightly to the twigs. Double white and double pink. Two feet, 75c each; three for \$2.10.

For August and September Flowers

One of the most showy and beautiful of shrubs, and especially desirable for hedges or flowering screen. The flowers are large and showy, ranging from white to violet. Eighteen inch, 25c each, three for 60c; 2 ft., 35c each, three for 90c; mail-size, 15c each.

ALTHEA, AMPLISSIMA—Large, double flowers, deep lilac-pink, carmine center.

ALTHEA, BOULE DE FEU—A variety producing showy semi-double violet, red flowers.

ALTHEA, DUCHESSE DE BRABANT—Large, double reddish lilac flowers.

ALTHEA, JEANNE D'ARC—Best of the white, double Altheas. Are hardy and free-flowering.

ALTHEA, TOTUS ALBUS—Pure white, single flowers of fine size and of great beauty.

AMORPHA, FRUTICOSA (False Indigo)—Grows 8 to 10 feet in height, in large, spreading bush form, with green leaves in pinnate arrangement. Its June flowers are of a deep violet blue. Two ft., 40c each; three for \$1.10; 3 ft., 45c each; three for \$1.25.

ARALIA PENTAPHYLLA—Long, slender and graceful arching branches and bright green shining foliage. Admirably adapted for planting banks and slopes; also for hedging. Greenish white flowers. 18 in., 35c each; three for 95c; 2 ft., 45c each; three for \$1.25; mail size, 20c each.

BARBERY, THUNBERGII—Leaves color to a beautiful red in fall and during winter the plant hangs full of bright red berries that make it most attractive. 15 in., 30c; 3 for 75c; 18 in., 40c; 3 for \$1.10; 2 ft., 50c; 3 for \$1.75; mail size 15c ea.

CORNUS SIBIRICA—Grows 5 to 10 feet high and hardy. It blooms in early summer, great clusters of small white flowers, followed in the fall by light blue berries. One of the strongest points in favor of this altogether lovely shrub is the blood-red color of the branches. This appearance of color in combination with snow gives a beautiful effect during the months when there is an absence of flowers. Two feet, 35c each, three for 90c; 3 feet, 40c, three for \$1.05; mail size, 15c each.

CALYCANTHUS—One of the most desirable shrubs. The wood is scented, the foliage rich, and flowers of a rare chocolate color, having a peculiar, delightful odor. The old-fashioned sweet-scented shrub of our grandmother's garden. 15 in., 40c, three for \$1.05; 18 in., 45c, three for \$1.20.

CEPHALANTHUS OCCIDENTALIS (Button Bush)—A tall growing native shrub, bearing yellowish-white flowers on small round, button-like heads in July. It thrives in moist shady places. Two feet, 50c each, three for \$1.35.

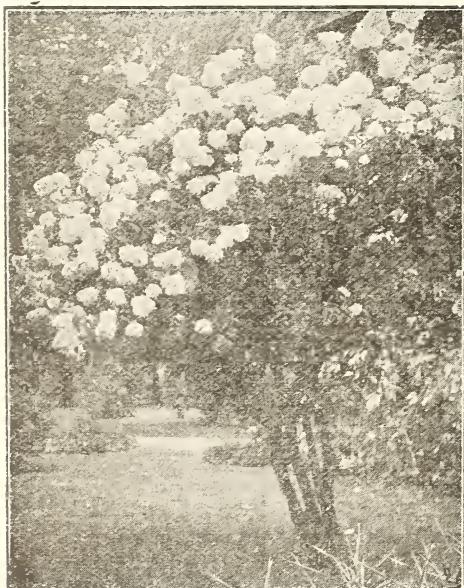

CLETHRA ALNIFOLIA (Sweet Pepper Bush)—A pretty little shrub, delightfully fragrant in September when covered with long, showy wands of white flowers. It is valuable for the front of the border, as it grows only 3 to 4 feet tall. 18 in., 45c each, three for \$1.20.

CORNUS SPAETHII AUREA (Golden)—Leaves with broad margins of golden yellow. Has a wide, spreading habit of growth, and regarded as the most beautiful Cornus. 18 in., 50c, three for \$1.35; 2 ft., 60c each, 3 for \$1.65; mail size, 30c each.

CORNUS STOLONIFERA—Rather dense growing form of Dogwood. Flowers large white, followed by pure white berries. Red branches. Fine for backgrounds and screens on account of its dense growth and heavy foliage, and its bright colored branches. Two feet, 35c each, three for 90c; 3 ft., 40c each, three for \$1.05; mail-size, 15c each.

DEUTZIA CANDIDISSIMA—Upright growing dense growth of clean foliage, dainty double bell-shaped flowers in thick wreaths in June. A special favorite where high-growing flowering plants are desired. Two feet, 30c each, three for 75c; 3 ft., 35c each, three for 90c; mail size, 15c each.

DEUTZIA CRENNATA—A vigorous growing shapely shrub, producing showy white flowers tinged with pink. Worthy of a prominent place in your planting; fine for cut flowers. Two feet, 30c each, 3 for 75c; 3 ft., 35c, 3 for 90c; mail size, 15c each.

Hydrangea

COLUTEA ARBORESCENS (Bladder Senna)—A large shrub, with small, delicate foliage, and yellow pea-blossom shaped flowers in June, followed by reddish pods or bladders. Two feet, 40c each, three for \$1.05.

CARAGANA ARBORESCENS—Shrub or low tree having pea-shaped yellow flowers in May. Its compound foliage resembles that of the Locust. Fine for backing up lower growing plants. Two feet, 50c each, three for \$1.35; 3 ft., 60c each, 3 for \$1.65.

SUMMER LILAC (Butterfly Bush)—Both names are most suggestive. For from mid-summer until fall the richly scented, lilac shaped, light bluish-pink flowers simply cover the entire plant. The sweet nectar it contains attracts the butterflies to it in great numbers. As many as 50 have been counted about one plant in a single afternoon. Two year old plants, 45c each, three for \$1.20; mail size, 16c each.

CORNUS ELEGANTISSIMA—Leaves variegated silver and green; branches purplish red. In summer the variegated leaves stand out as a novelty among other shrubs, and in winter the red branches add a touch of color to the gray brown and green bark about it. Two feet, 60c each, three for \$1.65; 3 ft., 65c, three for \$1.80; mail-size, 25c each.

Cornus

ELDER, CUT-LEAF (Sambucus Lacinata)—Leaves of this variety are fern-like in formation, which in connection with its half drooping habits, makes it very effective in massing. Two feet, 35c each, 3 for 90c; 3 ft., 40c each, 3 for \$1.05; mail size, 18c each.

ELDER, GOLDEN-LEAF—Great favorite on account of its golden foliage which, when planted with other high growing shrubbery, forms a marked contrast. Flowers white, in flat-topped cymes. Two feet, 45c each, 3 for \$1.20; 3 feet, 50c each, 3 for \$1.35; mail size, 25c each.

EUONYMUS ALATUS (Winged Burning Bush)—Of dwarf, compact habit; the leaves are small; wood very corky; fruit bright red. A fine shrub for solitary planting as well as for massing. The rich red of foliage in autumn makes this shrub very attractive. Two feet, 75c each, 3 for \$2.10; 3 ft., 90c each, 3 for \$2.55; mail size, 35c each.

ELEAGNUS LONGIPES (Japan Ol-easter)—A showy shrub of a strong bushy growth, with silver variegation in the lining of its leaves, which are dark green above. Its fragrant, creamy blossoms open in April or May; the scarlet, edible fruits hang thickly along its branches and are ripe in July. They make delicious sauces. Two feet, 65c each, 3 for \$1.80.

Deutzia

DEUTZIA GRACILIS—A species of charming habit, rarely growing over two feet high. Its slender, drooping branches are wreathed with pure white flowers. Fine for bordering high growing shrubs. One foot, 35c each, 3 for 90c; 15 in., 45c, 3 for \$1.20; mail size, 22c each.

DEUTZIA LEMOINEI—Dwarf form. Snow white flowers line its branches. One of the best, fine for planting in front of high growing sorts. 18 in., 40c each, 3 for \$1.05; mail size, 20c each.

DEUTZIA PRIDE OF ROCHESTER—A fine double flowering shrub blooming abundantly early in June. Flowers pink in bud and white when fully expanded. Plant a thick upright grower. Two ft., 30c each, 3 for 75c; 3 ft., 35c each, 3 for 90c; mail size, 15c each.

DEUTZIA WATERII—A neat, dense bush whose drooping branches are wreathed with pink flowers in early summer. Two feet, 30c each, 3 for 75c; 3 ft., 35c each, 3 for 90c; mail size, 15c each.

AMERICAN ELDERBERRY—A very attractive plant if used as backgrounds for lower growing shrubs and flowers. Being tall growing and of robust habit, the Elder will quickly blot out views that are objectionable. During the summer it blooms in great profusion which is followed by its fine fruit from which is made fine jellies and the richest of pies. Two feet, 35c each; three for 90c; three feet, 40c each, three for \$1.05; mail size, 15c each.

FRINGE, WHITE (Chionanthus Virginicus)—One of our handsomest shrubs. Flowers in loose, graceful panicles, white and fragrant. Leaves large, deep yellow in fall. These are followed by small, blue, plum-like fruits. Grows 10 feet high. 18 in., 75c each, 3 for \$2.10.

UPRIGHT GOLDEN BELL (Forsythia Fortunei)—Handsome, and erect-growing; deep green foliage, with a purplish tint in Autumn. It is among the first to greet the Springtime with its shower of golden yellow trumpet shaped flowers that appear in advance of the leaves. Two feet, 35c each, 3 for 90c; 3 ft., 40c each, 3 for \$1.05; mail size, 15c each.

HORIZONTAL GOLDEN BELL (Forsythia Intermedia)—A very abundant bloomer and hardy. Glossy green foliage. Deep yellow and fragrant, frequently blooms so early that we sometimes see the bright yellow flowers when the snow is flying. 18 in., 30c, 3 for 75c; 2 ft., 35c, 3 for 90c; 3 ft., 40c, 3 for \$1.05; mail size, 15c each.

ORDER EARLY

While stocks are complete and our packing and shipping service is at its best. Prompt attention given small as well as large orders.

Bush Honeysuckle

For mass plantings and effective backgrounds the bush honeysuckle has no equal among the shrubs, growing very dense and shapely with beautiful foliage and flowers.

HYDRANGEA, ARBORESCENS GRANDIFLORA—Called "Snowball Hydrangea" and "Hills of Snow." The blooms are of the very largest size of pure snow-white color. One of its most valuable characteristic is its coming into bloom just after the passing of all the early spring shrubs while its long season of bloom, from early June through August renders it doubly valuable to every owner of a garden, perfectly hardy. 15 in., 40c each, 3 for \$1.05; 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65; mail size, 25c each.

HYDRANGEA, TREE FORM—Has the same beautiful conical bloom as the Paniculata Grandiflora but trained to grow as a tree rather than a bush. Makes excellent backgrounds of color or fine for fixing the outlines of drives. Three feet, \$1.25 each, 4 ft., \$1.50 each.

HYDRANGEA, PANICULATA GRANDIFLORA—No other shrub is more frequently met with on lawns and in doorways, and it justly merits its popularity. Of strong, spreading habit, with large, terminal panicles of pure white flowers in August that change to a pinkish hue in September. 15 in., 40c each, 3 for \$1.05; 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65; mail size, 25c each.

HONEYSUCKLE, BELLA ALBIDA—Fine shrub growing 6 to 8 feet tall, with great clusters of fragrant white flowers in spring and immense "ropes" of bright red berries which cling to it all summer. One of the loveliest of the Bush Honeysuckles and fine for lawn decoration. Two feet, 40c each, 3 for \$1.05; 3 ft., 45c each, 3 for \$1.20; mail size, 18c each.

HONEYSUCKLE, MORROWII—Fine species from Japan. Grows 4 to 6 feet tall, and spreading. Its pure white flowers are quite attractive, but it is valued chiefly for the handsome red fruits which appear in August and hang on throughout the fall months. 2 ft., 40c each, 3 for \$1.05; 3 ft., 45c each, 3 for \$1.20; mail size, 18c each.

HONEYSUCKLE, RUFRECHTIANA—A new early flowering variety with showy white flowers followed by showy fruit in June. 2 ft., 40c each, 3 for \$1.05; 3 ft., 45c each, 3 for \$1.20; mail size, 18c each.

HONEYSUCKLE, TARTARIAN PINE—Erect grower, whose pink flowers in late

LILAC, ROTHOMAGENSIS—Rapid growing, with reddish purple flowers, borne in great clusters and very abundantly. Two feet, 50c each, 3 for \$1.35; 3 ft., 60c each; 3 for \$1.65.

FRENCH LILACS—The following French Lilacs bloom the second week in May and are extremely large and fragrant. They vary in color from the purest white to the richest tones of purple. They ultimately reach a height of six to eight feet. Prices of all the following assortment of fine varieties are the same:

LILAC, CHAS. X—Very dark purplish red. Single.

DR. BRETSCHNEIDERI—Large panicles of pretty pink flowers.

LILAC, MAD. CASIMER PERIER—Double cream white flowers, in large clusters.

LILAC, PRESIDENT GREVY—Superb double flowers of lovely blue. One of the finest.

LILAC, SENATEUR VOLLAND—Double rosy red. 2 ft., \$1 each; 3 for \$2.85.

PRUNUS PISSARDI (Purple Leaved Plum)—A small sized, elegant tree with purple leaves tipped brilliant red. Very desirable in lawn plantings for contrasting. Two feet, 75c each, 3 for \$2.10; 3 ft., \$1.00 each, 3 for \$2.85.

PRUNUS, TRILoba (Double Flowering Plum)—Charming tree-like shrub. Very early in spring before the leaves appear the whole tree is decked in a fleecy cloud of double light pink blossoms. 18 in., 75c each, 3 for \$2.10; 2 ft., \$1, 3 for \$2.85.

PHILADELPHUS, CORONARIUS (Garland Syringa)—Well known and highly esteemed shrub, pure white, highly scented flowers, which blossom very early in graceful sprays, and have a resemblance to orange blossoms. 2 ft., 40c each, 3 for \$1.05; 3 ft., 45c each, 3 for \$1.20; mail size, 15c each.

PHILADELPHUS, GRANDIFLORUS—Most vigorous of the group, growing ten feet high. Its long, irregular branches are clustered with large, slightly fragrant flowers in June. Two feet, 40c each, 3 for \$1.05; 3 ft., 45c each, 3 for \$1.20; mail size, 15c each.

PHILADELPHUS, GOLDEN LEAF—Very pretty shrub of medium size, with golden-yellow leaves, which retain their color throughout the summer and autumn. Very valuable in creating pleasing and striking contrasts with other shrubs. 1 ft., 50c each, 3 for \$1.35; 15 in., 60c each; 3 for \$1.65; mail size, 35c each.

PHILADELPHUS, GORDONIANUS—Has grayish-brown bark, produces large white flowers in late July. Two feet, 40c each, 3 for \$1.05; 3 ft., 45c each, 3 for \$1.20; mail size, 15c each.

PHILADELPHUS, LEMOINEI—Dwarf, compact habit, flowers large and fine; semi-double, blooming in June; very fragrant. 18 in., 40c each, 3 for \$1.05; 2 ft., 45c each, 3 for \$1.20; mail size, 18c each.

RHODOTYPOS, KERRIOIDES—An attractive shrub of medium size from Japan. Foliage very rich, dark green color. Single white flowers in late May followed by black fruit. 18 in., 40c, 3 for \$1.05; 2 ft., 50c each, 3 for \$1.35; mail size, 20c each.

RHUS COPALLINA (Shining Sumac)—Has beautiful foliage of lustrous green in summer and changing to rich crimson in autumn. Produces heads of yellow flowers in August. Very ornamental and used for planting in large masses. 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65.

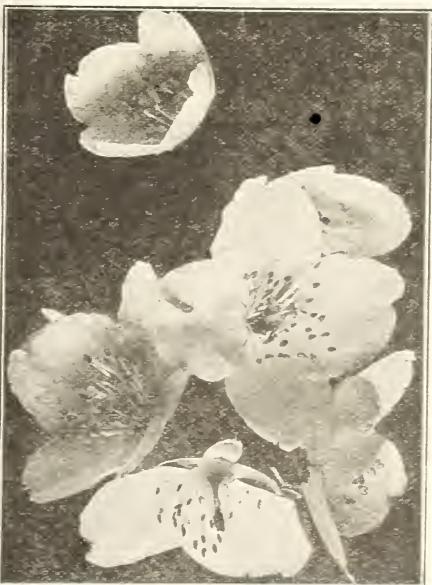

Liac

spring contrast beautifully with its bright green foliage. In summer and autumn its orange berries literally cover the plant. 2 ft., 45c each, 3 for \$1.20; 3 ft., 50c each, 3 for \$1.35; mail size, 20c each.

HONEYSUCKLE, TARTARIAN WHITE—Early flowers are a delicate blush white and wins favor and adds great beauty to every spot it fills. 2 ft., 45c each, 3 for \$1.20; 3 ft., 50c each, 3 for \$1.35; mail size, 20c each.

PURPLE LILAC—Old fashioned sweet scented, purple lilac of our childhood. Their fragrance should bless every home and fasten the memory to the scenes we knew as children. 2 ft., 50c each, 3 for \$1.35; 3 ft., 60c each, 3 for \$1.65.

WHITE LILAC—Similar to the Purple Lilac, except that the flowers are white. 2 ft., 50c each, 3 for \$1.35; 3 ft., 60c each, 3 for \$1.65.

Syringa—Philadelphus

RHUS, GLABRA (Smooth Sumac)—Grows to low tree 10 to 15 feet high with an open crown and compound leaves. Flowers in July in panicles followed by crimson or brown fruit clusters which persist all winter. Foliage colors beautiful in autumn. Four feet, 50c each, 3 for \$1.35; 5 ft., 60c each, 3 for \$1.65.

RHUS, TYPHINA (Staghorn Sumac)—May be trained to either tree or bush form. Flowers in June and July in dense terminal panicles followed by red fruit. Four feet, 60c each, 3 for \$1.65; 5 ft., 75c each, 3 for \$2.10.

SNOWBALL—That well-known plant of the old-fashioned gardens which so often is the only blooming shrub at Decoration Day time. 18 in., 50c each, 3 for \$1.65; 2 ft., 60c each, 3 for \$1.65; 3 ft., 75c each, 3 for \$2.10; mail size, 25c each.

SNOWBALL, JAPAN—One of the finest of shrubs, moderate in growth and compact in form. Foliage curiously crinkled and large, globular flowers of purest white produced all over the bush. 18 in., 75c each, 3 for \$2.10; mail size, 30c each.

SNOWBERRY, RED—A graceful growing shrub, most conspicuous in fall when its branches, clustered full of bright red berries, droop to the ground beneath their weight. Thrives in densely shaded situations. 18 in., 50c each, 3 for 75c; 2 ft., 35c each, 3 for 90c; 3 ft., 40c each, 3 for \$1.05; mail size, 18c each.

SNOWBERRY, WHITE—18 in., 35c each, 3 for 90c; 2 ft., 40c each, 3 for \$1.05; 3 ft., 50c each, 3 for \$1.35; mail size, 18c each.

STEPHANDEA FLEXUOSA—An attractive three-foot shrub especially suitable for bordering other shrubs, deep lobed foliage that colors to purplish red in fall, panicled racemes of white flowers in June. 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65.

SPIREA, BILLARDI—2 ft., 35c each, 3 ft., 40c each, 3 for \$1.05; mail size, 18c each.

SPIREA, OPULIFOLIA (Nine Bark)—The strongest growing sort, attaining 8 to 10 ft. Growth upright, although the white, heavy flower umbels in June make the branches droop; old flower heads turn to dark red and make a striking variety of colors at different stages of maturity. 2 ft., 40c each, 3 for \$1.05; 3 ft., 50c each, 3 for \$1.35.

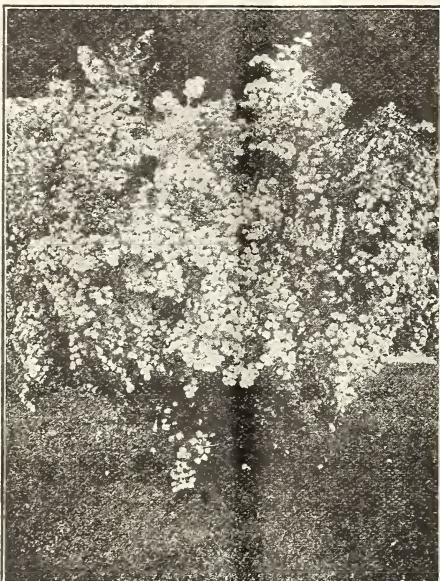

SPIREA, OPULIFOLIA AUREA (Gold Spirea)—Of similar habit to above, with young foliage of bright yellow, changing to golden-bronze in the fall. 2 ft., 40c each, 3 for \$1.05; 3 ft., 50c each, 3 for \$1.35; mail size, 18c each.

SPIREA, PRUNIFOLIA (The Real Bridal Wreath)—It is one of the earliest bloomers in the spring and every one of its long, gracefully curved branches have their whole length covered with small double white flowers. Its leaves are beautifully shaped, like those of the plum, and while it will attain a great height if desired it can be trimmed to a low head where that shape is desired. Except the Peony, the Bridal Wreath is the best known and most sought for plant in the United States. 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65; mail size, 22c each.

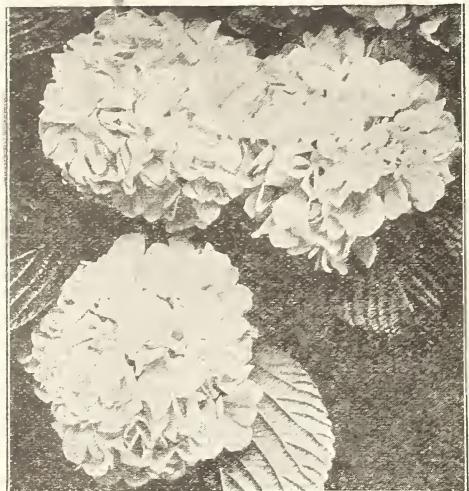

SPIREA THUNBERGII—Forms a dense, feathery bush. Three to five feet high, the foliage in autumn changing to bright red and orange. Flowers pure white, borne in feathery masses in early spring. 15 in., 35c each, 3 for 90c; 18 in.,

Weigela Rosea

Spirea Van Houttei

Snowball

VIBURNUM, DENTATUM (Arrow-wood)—Flat headed, creamy white flowers thru May and June, and its dark green, heart shaped leaves that turn to purple and red as the season advances make the Dentatum one of the admired of the Snowball family. 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65; mail size, 25c each.

VIBURNUM, LANTANA (Way-faring Tree)—Covers itself with white flowers for all of May and June, while its wrinkled and artistically twisted leaves and its fruit colors ranging from lightest purple to deepest black, enable it to provide a pleasing combination of colors for each day of the whole summer. 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65; mail size, 25c each.

VIBURNUM, OPULUS (High Bush Cranberry)—A very decorative native shrub, growing 8 to 10 feet high, with white flowers, followed by beautiful, showy clusters of bright red berries. 18 in., 50c each, 3 for \$1.35; 2 ft., 60c each, 3 for \$1.65; mail size, 20c each.

TAMARIX, AFRICANA—Tall growing shrub with feathery foliage like that of the Juniper. Small pink flowers in May and June. Splendid for planting in damp places. 2 ft., 35c each, 3 for 90c; 3 ft., 45c each, 3 for \$1.20; mail size, 20c each.

WEIGELA, AMABILIS—Vigorous and attractive, with light pink flowers, freely borne on the spreading branches. 18 in., 45c each, 3 for \$1.20; 2 ft., 50c each, 3 for \$1.35; mail size, 20c each.

WEIGELA, DESBOISII—Rather erect grower producing dark rose colored flowers in great profusion. 18 in., 35c each, 3 for 90c; 2 ft., 50c each, 3 for \$1.35; mail size, 20c each.

WEIGELA, EVA RATHKE—Upright grower. Flowers of dark carmine-red. One of the most popular shrubs. 18 in., 60c each, 3 for \$1.65; 2 ft., 75c each, 3 for \$2.10; mail size, 25c each.

WEIGELA, HENDERSONII—Beautiful spreading bush with bright crimson flowers. 2 ft., 50c each, 3 for \$1.35; 3 ft., 60c each, 3 for \$1.65; mail size, 25c each.

WEIGELA, LUTEA—Small bright yellow flowers in terminal racemes during mid-summer. 2 ft., 50c each, 3 for \$1.35; mail size, 25c each.

WEIGELA, ROSEA—The most popular of all the weigelias; a tall growing vigorous sort with deep pink flowers in the greatest abundance in June, and more sparsely at intervals throughout the summer.

18 in., 45c each, 3 for \$1.20; 2 ft., 50c each, 3 for \$1.35; 3 ft., 60c each, 3 for \$1.65.

WEIGELA, VARIEGATED LEAVES—Leaves are margined with creamy-white; flowers pink. Dwarf, much used for contrastive purposes. 15 in., 50c each, 3 for \$1.35; 18 in., 60c each, 3 for \$1.65; mail size, 30c each.

PROGRESS HEDGES

To successfully plant a hedge, dig a ditch 16 inches wide and the same depth. Fill it one-half full of rich earth, then set the plants, filling in around them with the same rich soil. Tramp the dirt as solid as you can get it.

All hedge plants of erect growth should be set in the trench in two rows six inches apart and twelve inches apart in the row so that in looking through the row the plants just after setting will appear zig-zag. This gives you a plant every six inches and assures a solid wall that can be moulded into any desired shape with the shears. California and Amoor River Privet should be set in a double row. All wide growing weeping plants like Barberry and Iбота Prive' should be set in a single row.

Before selecting your hedge study about the different plants we recommend for hedges that are described below:

CALIFORNIA PRIVET—The most widely planted of all hedge plants. It is a quick, strong grower, yet easy to control with knife or shears. Very easy to grow in any soil, doing well even in partial shade. For best effect should be planted in a double row, one foot apart in each row, so as to appear zig-zag and requires two plants for each foot of hedge-row you may desire. Its wonderful green, glossy foliage and quick growth, popularizes it with all who want a hedge that can be shaped and controlled in every way through the frequent use of shears. 1 to 1½ feet high, 25 plants for \$1.50, 100 for \$4.50. 1½ to 2 feet high, 25 plants for \$2.00, 100 for \$6.00; 2 to 3 feet high, 25 plants for \$2.50, 100 for \$8.00.

AMOOR RIVER PRIVET—The Chinese variety, very hardy, has dark green leaves which persist almost through the winter. Where a stiff upright hedge is wanted, nothing surpasses the Amoor. To add to its attractiveness in foliage it bears erect panicles of beautiful white flowers in June, followed by black berries. For best effect should be planted in a double row, one foot apart in each row, so as to appear zig-zag and requires two plants for each foot of hedge-row you may desire. Its wonderful green, glossy foliage and quick growth, popularizes it with all who want a hedge that can be shaped and controlled in every way through the frequent use of shears.

1 to 1½ feet high, 25 plants for \$2.50; 100 for \$7.50. 1½ to 2 feet high, 25 plants for \$3.25; 100 for \$10.00. 2 to 3 feet high, 25 plants for \$4.50; 100 for \$15.00.

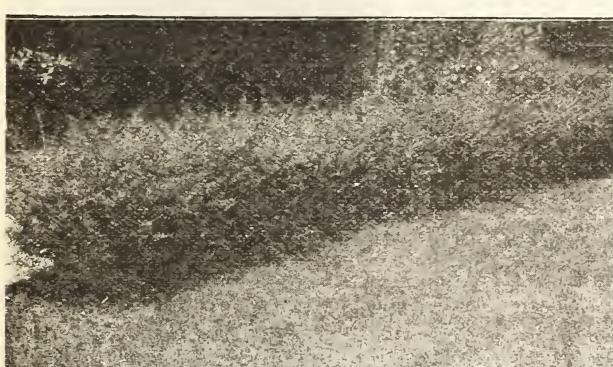

IBOTA PRIVET—A fine and hardy border shrub of spreading habit, with curving branches and leaves of grayish-green. Pure white flowers in June followed by bluish-black seeds. Makes an excellent hedge. Where grounds are large and space is not scarce, the spreading character and heroic type of Iбота will be welcomed. It is hardy in all climates and whether used as hedge or as a shrub in land-

Amoor River Privet

scape arrangement, its flat, gray-green branches gives it unusual prestige among the shrubs. Plants should be set in a single row one foot apart. 1 to 2½ feet, 25 plants for \$2.50, 100 for \$7.50; 1½ to 2 feet, 25 plants for \$3.25, 100 for \$10.00; 2 to 2½ feet, 25 plants for \$4.50, 100 for \$15.00.

BARBERRY THUNBERGII—Not only an invaluable shrub where a low, compact hedge is wanted, but fits in admirably with other shrubs in every planting. Has handsome foliage of tiny bright green oval leaves then turns the most brilliant shades of orange and red in the fall. The slender, graceful branches are thickly lined with scarlet berries throughout the early winter. This is the hedge that has a beautiful feature for each day of the year. Beautiful little round leaves as foliage comes while the rich crimson berries of the year previous are still clinging to the bush. The flesh pink bloom follows and these change to berries that develop and ripen through the whole summer. The frosts of fall give to the Barberry Thunbergii, every shade of yellow, pink, cream, gold, bronze and brown till at last real winter causes the leaves to fall and behold the entire hedge decorated with rich looking crimson-red berries to remain till spring's coming. Plants are to be set in a single row, one foot apart for hedgemaking, or may be used single or in groups about the house foundation for landscape effects. Their little stickers or spines remind meddlesome people and intruding animals that they must not be tramped upon. 12 to 15 inches, 25 plants for \$5.00, 100 for \$16.00; 15 to 18 inches, 25 plants for \$7.50, 100 for \$24.00.

Barberry

NOTICE!

When purchasing hedge plants do not make the mistake of ordering short. Better to have a few left over than not enough.

PROGRESS EVERGREENS

BEAUTY FOR THE WHOLE YEAR

While everybody loves Trees and Shrubs, of every kind, for their color of foliage and bloom and fragrance, the Evergreens are those that hold their foliage through the days and nights of bleakest stormiest winter. This year-around service of Evergreens commends them to everyone, who would have these reminders of life and growth when all the remainder of nature was at rest and no leaves of nature's beautiful green to be seen anywhere.

In Winter, the Evergreens will be nice for you to look upon and whether planted as single specimens, in groups about the lawn or in screens or hedges, they present a touch of peculiar beauty and improvement that makes the Evergreens a friend through the whole year and worthy of its place in the most prominent part of the lawn.

Each Progress Evergreen will be found described under its own classification and not with ball of earth or burlapped roots. If you desire them balled and burlapped, add ten cents on each foot in height to the prices quoted on the different size trees.

Juniper Sabina

ARBORVITAE, ORIENTAL—A slender pyramid with soft dark green foliage. A distinctive plant that lends its charm and beauty to any planting. 18 in. high, \$2.00 each; 2 ft. high, \$2.50 each.

ARBORVITAE, PUMILA—A dwarf dense globe form with charming dark green foliage. Fine for low foundation planting or for bordering high growing plantings. 1 ft. high, \$1.25 each; 15 in., \$1.50; 18 in., \$2.00.

ARBORVITAE, PYRAMIDALIS—A distinct columnar growth. Is very densely branched with foliage of a glossy green shade. Valuable for groupings, background, hedging, planted as single specimens, or in pairs, in (act at home in any planting, adding beauty and charm to any situation. 18 in. high, \$1.50 each; 2 ft., \$2.00 each.

ARBORVITAE, WAREANA—Of low pyramidal form, stiff branches of dark green foliage. Being a slow grower it is very valuable for foundation plantings or for plantings in front of high growing varieties. 15 in. high, \$1.50 each; 18 in. high, \$2.00 each.

ARBORVITAE, WOODWARD—A very compact regular type. Handsome shade of deep green. Fine for bordering higher growing plants or as individual specimens. 1 ft. high, \$2.00 each; 15 in. high, \$2.50 each.

BIOTA AUREA NANA—A perfect gem. Conical form, very dense and compact. During spring and summer it presents the most cheerful and bright yellowish-green imaginable which changes to deep green during the winter. One of the finest of the dwarf type. 1 ft. high, \$2.50 each; 15 in., \$3.00 each.

BIOTA COMPACTA—Dense, pyramidal shape, of dwarf habit. Very attractive dense green foliage. 1 ft. high, \$2.25 each; 15 in., \$2.50 each.

JUNIPER, CANADENSIS—A prostrate growing variety with light green foliage; fine for planting on banks and terraces. 15 in. high, \$2.50 each; 18 in., \$3.00 each.

JUNIPER, IRISH—Columnar in habit and quite compact in growth, foliage deep green, making a splendid pyramid. 15 in. high, \$1.00 each; 18 in., \$1.50; 2 ft., \$2.00.

JUNIPER, FITZTERIANA—Of upright spreading growth, grayish green foliage. One of the hardiest varieties. Thrives anywhere. 2 ft. high, \$5.00 each; 3 ft., \$6.50 each.

JUNIPER, SABINA—A thickly branched low spreading tree. Its nature of growth adapts it particularly as a connecting link between the grass and taller evergreens in a mixed border. 12 in. wide, \$1.50 each; 15 in., \$2.00; 18 in., \$2.50 each; 2 ft., \$3.00 each.

JUNIPER, STRICTA—A beautiful, compact growing variety with tapering outline which retains its color throughout the winter. 12 in. high, \$2.00 each; 15 in. \$2.50 each.

JUNIPER, SWEDISH—A dwarf variety of symmetrical habit with bright green foliage which retains its color throughout the winter. 15 in. high, \$1.25 each; 18 in., \$1.75; 2 ft., \$2.50.

JUNIPER, TAMARISCIFOLIA—A creeping form with soft needles borne in threes of a bright green, each with a white line on top, giving the plant a very dainty appearance. Fine for edging. 15 in. wide, \$2.50 each; 18 in., \$3.00 each.

JUNIPER, VIRGINIANA—Is of medium and compact growth, foliage in summer is bright green, in winter a bronzy hue is assumed. 18 in. high, \$1.75 each; 2 ft. \$2.50; 3 feet, \$3.00.

ARBORVITAE, AMERICANA—The well known variety especially valuable for screens and hedges. Erect pyramidal habit with soft light green foliage. Grows naturally to a tree but can be kept down to hedge size by shearing. 18 inches high, \$1.25 each; 2 feet, \$1.50; 3 ft., \$3.00; 4 feet, \$4.00; 5 ft., \$5.00.

ARBORVITAE, ELEGANTISSIMA—A distinct form of low, columnar habit. Tipped bright yellow in summer and chocolate brown in winter. Adds rich tone and elegant touch to any plantings. 15 inches high, \$1.50 each; 18 inches high, \$2.00 each.

ARBORVITAE, ELLWARGENIANA—A low, broad pyramid with slender branches clothed with short needled and feathery foliage. Holds its fresh color throughout the year. 1 ft. high, \$1.50 each; 15 inches, \$2.00; 18 inches, \$3.00.

ARBORVITAE, ERICOIDES—A very pretty dwarf type with very fine foliage which in summer is bright green turning to bronze in winter, making it most conspicuous. 10 inches high, \$1.00 each; 1 ft., \$1.25; 15 in., \$1.50; 18 in. \$2.00; 2 ft., \$2.50.

ARBORVITAE, GLOBOSA—Forms a dense low globe of a handsome shade of green. Useful in low foundation plantings, or bordering high growing evergreens and unsurpassed where a low dense hedge is desired. 1 ft. high, \$2.00 each; 15 in., \$2.50; 18 in., \$3.00.

ARBORVITAE, HOVEY'S GOLDEN—Elliptical in form and is very compact. Foliage light green with golden tinge. A very distinct, bright and pleasing shade; of value in turning up sober green in borders and foundation plantings. 15 in. high, \$2.50 each; 18 in. high, \$3.00.

ARBORVITAE, LUTEA (George Peabody)—Is tall growing of broad pyramidal form with clear, lasting golden yellow foliage which in summer gilds the plant all over and changes to delicate green in winter. 1 ft. high, \$1.25 each; 15 in., \$2.00; 18 in., \$2.50.

ARBORVITAE, SIBERIANA—A very hardy variety with bluish green foliage. Of low stocky pyramidal growth, forming a broad, dense, bushy effect. At home in all plantings, its rugged appearance adding a touch all its own. 15 in. high, \$1.50 each; 2 ft., \$2.00 each.

ARBORVITAE, TOM THUMB—Small, compact with feathery foliage of bluish-gray. A charming addition to any planting. 1 ft. high, \$1.00 each; 15 in., \$1.25; 18 in., \$1.50.

ARBORVITAE, VERVAENEANA—Dense type. The branchlets are very slender and willowy. Foliage variegated with yellow in summer giving the plant a light golden tinge of green, changing to a pretty mottled bronze in winter. 15 in. high, \$1.50 each; 18 in. \$2.00 each.

Retinispora Filifera

AUSTRIAN PINE—One of the best for border or mass planting, or as a shelter or screen. Its glossy, dark green needles and rugged branches will stand the smoke of cities. 2 ft. high, \$1.75 each; 3 ft., \$2.50 each.

MUGHO PINE—Especially valued for rock gardens, foundation plantings and wherever a dwarf Evergreen of good color is wanted. A popular sort of long life, which is also useful in producing immediate effects. It grows in a low mound-like form, and is very hardy. 12 in. wide or high, \$3.00 each; 15 in., \$3.50 each.

SCOTCH PINE—Like the Austrian, its quick, strong growth makes it valuable for protective screens; very hardy. 2 ft. high, \$2.50 each; 3 ft., \$3.50 each.

WHITE PINE—This is the grand old Pine that we all know so well—standing staunchly against wind and weather to a good old age. 2 ft. high, \$2.00 each; 3 ft., \$3.00 each.

SMALL EVERGREEN PLANTS

These Small Evergreens are grown in two and one-half inch pots and five to ten inches high. They are nice hardy little plants of the same varieties as the larger and high priced plants found described on preceding pages. These little plants if carefully planted in the lawn in well prepared soil and guarded against injury, will develop rapidly into beautiful well-shaped valuable plants in your lawn. Additional to the pleasure of planting and caring for these little beauties, in years to come, you can hardly realize that your fine plants were originally purchased for just a few cents each. This is your fine opportunity to secure some of these plants, if your order comes before this assortment of our Small Evergreens is exhausted.

PLUME-LIKE FOLIAGE

	Each	Per 10
Arborvitae, Ellwangeriana, 5 to 7 inches	.35	3.00
Retinispora, Plumosa, 5 to 7 inches	.35	3.00
Retinispora, Plumosa, Aurea, 5 to 7 inches	.35	3.00
Retinispora, Pisifera, 5 to 7 inches	.35	3.00
Retinispora, Squarrosa, 5 to 7 inches	.35	3.00

DWARF BALL SHAPE

	Each	Per 10
Arborvitae, Ericoides, 5 to 7 inches	.35	3.00
Arborvitae, Globosa, 5 to 7 inches	.35	3.00
Arborvitae, Howeii, 5 to 7 inches	.35	3.00
Arborvitae, Pumila, 5 to 7 inches	.35	3.00
Arborvitae, Thumb, 5 to 7 inches	.35	3.00

JUNIPERS

	Each	Per 10
Juniper, Irish, 5 to 7 inches	.30	2.50
Juniper, Pfitzeriana, 5 to 7 inches	.40	3.50
Juniper, Stricta, 5 to 7 inches	.40	3.50
Juniper, Sabina, 5 to 7 inches	.45	4.00
Taxus Cuspidata, 4 to 6 inches	.50	4.50

PYRAMIDAL SHAPE

	Each	Per 10
Arborvitae, American, 5 to 7 inches	.30	2.50
Arborvitae, Lutea, 5 to 7 inches	.40	3.50
Arborvitae, Pyramidalis, 5 to 7 inches	.35	3.00
Arborvitae, Siberian, 5 to 7 inches	.35	3.00
Arborvitae, Vervaeana, 5 to 7 inches	.35	3.00

THE RETINISPORA

RETINISPORA PISIFERA—A beautiful plant with light green, feathery foliage, branches somewhat pendulous at the ends. Produces a softening effect when planted along with the stiffer growing varieties. 18 in. high, \$2.50 each; 2 ft., \$3.00 each.

RETINISPORA FILIFERA—A plant of very graceful long thread-like branches. Very pendulous. Foliage light green. Its charming habit makes it a favorite wherever it is planted. 15 in. high, \$2.00 each; 18 in., \$2.50 each; 2 ft., \$3.50; 3 ft., \$5.00.

EVERGREEN

Put in Mission or Ornamental Boxes or Large Pots, these large leaved Evergreens can be used for porch decoration or setting on either side of the front walk leading to the main entrance to the home. These are well formed selected plants in either the Pyramidal or Bushy shapes and will prove most interesting and satisfactory.

Retinispora Plumosa

RETINISPORA PLUMOSA—A Japanese variety of soft plume-like, feathery foliage of light green. Very graceful in habit of growth. Stands shearing to any desired form. 15 in. high, \$2.00 each; 18 in., \$3.00; 2 ft., \$3.50; 3 ft., \$5.00; 4 ft., \$7.50.

RETINISPORA PLUMOSA AUREA—Of exactly same type as above but having rich golden yellow tipped foliage. Fine for contrast work. 15 in. high, \$2.00 each; 18 in., \$3.00; 2 ft., \$3.50; 3 ft., \$5.00.

BOXWOOD

Bush shape, 15 to 18 in. high, \$1.00 each; Pyramid shape, 2½ ft. high, \$5.00 each, 3 ft. high, \$6.00 each. NOTE: Many of the Small Leaved Evergreens like Arbor Vines, Pyramidalis and Woodward, Juniper Irish and Retinispora Plumosa, can be used and make lasting and beautiful plants for porch boxes.

FROM CASEY, ILLINOIS.

Am taking pleasure in writing you in regard to the Cumberland Raspberries we bought of you. They certainly did fine, never lost but a few, and larger, finer berries I never saw. Canned nine gallons, used all we wanted, and gave some away and have another nice row set out of them, where they had taken root. There was one bush in them that bore all summer. I picked a handful of fine berries off of it the 10th of September. Can sure recommend your Cumberland Berries to anyone.

ROY DICKEY, Route No. 2.

Potted Evergreen

Gladioli

As a cut flower they are far superior to any other summer bloomer. If cut when the first bud begins to unfold they will last many days, until the very tip buds are open. They are appropriate for any of the various uses for which cut flowers are employed, as they may be had in all colors from the most delicate and dainty shades to the boldest, most gloriously gorgeous imaginable.

They are of the easiest culture. Plant 3 to 5 inches deep in any good garden soil, keep the surface of the soil loose and free from weeds, and success is assured.

BARON JOSEPH HULOT—Deep indigo blue, 2½ inch flowers well placed. Spike tall. The best blue. 10c each; per 10, 80c; \$6.00 per 100.

EMPEROR OF INDIA—Rich dark, velvety crimson. Two lower petals with white line on mid-rib. Flowers 3½ inches in diameter, well placed. Many out at a time. Early. 10c each; per 10, 80c; \$6.00 per 100.

FAUST—Wine red. Immense flowers on tall spike. Each 10c; per 10, 65c, \$6.00 per 100.

INDEPENDENCE—Rich coral pink with darker blotch in throat. Orchid type, 3 inch flower. An excellent flower of fresh and beautiful color. 8c each; per 10, 65c; \$5.00 per 100.

LILY LEHMAN—White, touched sometimes with faintest rose. Lily type. Petals slightly ruffled. 4 inches. Early. One of the best whites. 15c each; per 10, \$1.20; \$10.00 per 100.

MRS. FRANCIS KING—Lincoln red. Small blotsches of deeper red in throat, 4 inches. Each, 8c; per 10, 65c; \$5.00 per 100.

MRS. FRANK PENDLETON—A showy variety, winner of many awards. Rose pink on a white ground, with blood red blotsches on lower petals. 4½ inches. 15c each; per 10, \$1.20; \$10.00 per 100.

NIAGARA—Beautiful primrose or cream yellow, faintly tinged with lilac-rose in throat. Large open flower on a strong spike. 10c each; per 10, 80c; \$6.00 per 100.

PINK BEAUTY—Rosy pink with darker blotch. Flowers open 2½ inches, good spike. Very early. 8c each; per 10, 65c; \$5.00 per 100.

PRINCEPS—Rich scarlet with conspicuous white blotch. Very large and showy. Stands heat and drought well. Late. 12c each; per 10, \$1.00; \$8.00 per 100.

PANAMA—Hermosa pink. Wide open, wax like flowers, well placed. Probably the best of the clear pinks. 10c each; per 10, 80c; \$6.00 per 100.

PEACE—Pure white with lilac pencilings in the throat. Immense spikes of large flowers. Late. 12c each; per 10, \$1.00; \$8.00 per 100.

Niagara Gladioli

PRIMULINUS—This is a class of gladiolus having smaller flowers on long slender graceful spikes. In color they come in soft delicate shades of yellow and orange. In mixtures only. 10 for 80c; \$6.00 per 100.

WILBRINK—Flesh pink with cream blotch, is daintily striped with deeper pink on lower petals. 15c each; \$1.20 per 10; \$10.00 per 100.

DINSMORE'S MIXTURES—There is a certain delight in a bed of mixed gladioli, as one never knows what to expect, and there are almost daily surprises throughout the season. An excellent mixture. 10 for 70c; \$5.00 per 100.

Independence

Old Fashioned Garden Flowers

A well arranged selection of our hardy plants will produce a continuous succession of blooms, so that your garden can be kept bright throughout the entire growing season. Not only is their bloom very pleasing for lawn decoration, but they can be used as well for cut flowers, a combination required of flowering plants.

The hardy plants have an advantage of great permanency, as they withstand the most severe climate, and after being once planted in good soil will only require occasional cultivation and fertilizing. Fertilize them by placing well rotted manure on the soil about the plant and hoe in.

Plant them in beds, borders or clumps, with shrubbery planting. The tall growing varieties may be effectively planted in the shrubberies, their flowers contrasting with the shrubs or evergreens as a background; the lower sorts may be used in border plantings, thus blending nicely the edge of shrubbery and lawn.

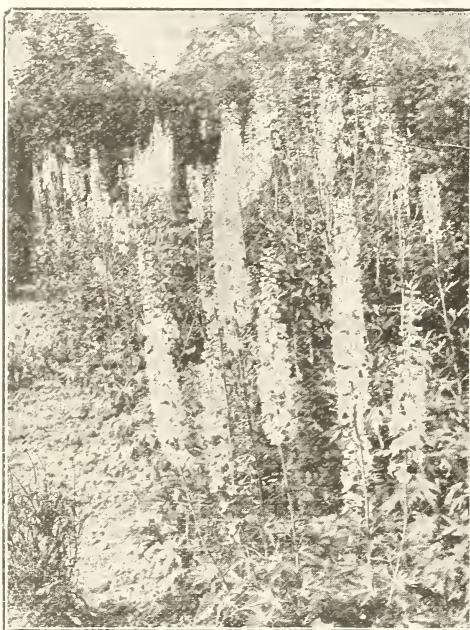

Any Garden Flower except Hibiscus: 15c each; 10 of any one kind for \$1.25; 100 for \$10.00. Heavy Plants for Formal Garden work, 25c each.

ANCHUSA ITALICA—Four feet. May to July. Flowers a lovely gentian blue, almost completely covering stem.

AQUILEGIA (Columbine)—The old garden favorite. Pink, golden yellow, blue and white, red and yellow, and pure white. Blooms in May and June.

CAMPANULA CALYCANTHEMUMA—Two feet. June to August. Cup and Saucer Canterbury Bells. White, rose and blue.

HARDY GARDEN CHRYSANTHEMUMS—Every garden should have them. We can supply them in reds, whites and yellows.

Delphinium

EXPRESS DELIVERY LIMITS

Some of our customers who live just outside of the Free Express Delivery limits of their city may specify some residence or store within such limits where the express company can make delivery for them. This insures prompt delivery and saves time and money for the customer.

It is reported that some of our customers have been compelled to pay exorbitant charges for such outside delivery.

Dinsmore's Dahlias

The Dahlia is probably the best known, the best liked, and the most widely planted of all garden plants, and more than that, it is easy to grow, it flowers freely, and here is a wide range of color in various forms, the qualities that make of it a valuable flower for both commercial purposes and for the home garden and cut flower supply.

Dahlias should be planted about the first of May, covering the tubers with about three inches of soil. Pinch off the weakest shoots leaving one or two of the strongest, and when six or eight inches, prune back to the second joint to make the plant more bushy. Cultivate lightly and give plenty of water and sunshine.

A. D. LIVONI—A beautiful soft pink flower with quilled petals. 25c each \$2.00 per 10.

DREER'S WHITE—Pure glistening white and unsurpassed by none in freedom of flowering. 30c each; \$2.50 per 10.

FIRE BURST—Extra large red. 20c each; \$1.75 per 10.

GENERAL FRENCH—Orange Terra Cotta. 25c each; \$2.00 per 10.

IRON MONGER—Lavender and white variegated. 30c each; \$2.50 per 10.

ROSE—A new rose colored flower of great promise. The broad petaled flowers borne on long stems are fine for cutting. 30c each; \$2.50 per 10.

SNOW BALL—The name is an accurate description of the flowers. A sturdy plant and free bloomer. 25c each; \$2.00 per 10.

SNOW CLAD—Dwarf growing, white quilled, and free flowering. 20c each; \$1.75 per 10.

SOUVENIR DE GUSTAV DOAZON—The largest Dahlia in existence, the flowers often measuring from eight to nine inches in diameter. Orange-red in color. 35c each; \$3.00 per 10.

WHITE SWAN—Extra large, pure white and a great favorite. 25c each; \$2.00 per 10.

YELLOW DUKE—Free flowering and long stemmed. Its full quilled bloom of primrose yellow being exceedingly soft and pretty. 25c each; \$2.00 per 10.

Rose Dahlia, a New Creation

CACTUS DAHLIA

AMOS PERRY—Salmon red and a free bloomer. 25c each; \$2.00 per 10.

FLORADORA—Medium sized velvety dark-crimson flower produced in great profusion. 35c each; \$3.00 per 10.

QUEEN OF HEARTS—Clear white, large, well formed incurved flowers of chaste beauty. 25c each; \$2.00 per 10.

DINSMORE'S MIXED DAHLIAS—Ten great big healthy roots for \$1.00.

"THE SAY-SO OF PROGRESS CUSTOMERS"

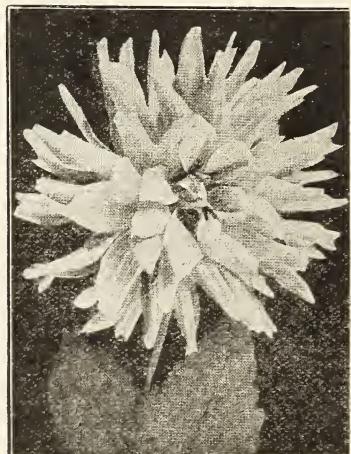

Each year we receive a great many letters commenting on the high quality of our goods and the helpfulness of our service. Our business is extended through these recommendations of appreciation to the old customer and for the assurance of the new customers, we now seek.

FROM DAYTON, OHIO.

Just a line to thank you for the trees I have received. I was very well satisfied with them. I will mention your name to all my friends.—H. Knight, New Troy Pike, Route No. 5.

FROM MADISON MILLS, OHIO.

The trees arrived in good shape and are surely fine looking young trees.—Mrs. Maud Hanna.

Cactus Dahlia

Dinsmore's Iris

In planting Iris, care should be taken not to bury the thick root stock, from which the true roots descend, too deeply. Merely place it firmly in the soil, partially exposed if of good size. The planting site must not be so low that the water will stand upon them during the winter. Plant in August and September and they will bloom the following April and May immediately following the Tulips and Hyacinths.

We are not offering an extravagant list of varieties, but those that we do offer are distinct one from the other in color, ranging from white to deep purple. Price: Each, 12c; per 10, \$1.00; per 100, \$8.00.

NOTE: In our description, "stands" signifies the erect petals of the flower, and "falls" the drooping petals.

CELESTE—Stands lavender; falls deeper lavender. A free bloomer and the largest of our collection.

FLORENTINE—Soft shade of grayish-white. Very free and early bloomer.

MADAM CHEREAU—Stands and falls pure white, with a light penciling of azure blue around the edge of each petal. This is an exquisite bloom and never fails to command the highest admiration.

NEGLECTA—Stands, pale lavender; falls, light brown, edged with deep purple. A beautiful specimen.

PALLIDA DALMATICA—Both stands and falls an exquisite shade of delicate lavender; sweet scented and blooms freely on stately spikes three to four feet high.

PARISIENSIS—Stands a beautiful light blue. Falls, deep blue. Early bloomer and extra large.

FROM FAIRMONT, W. VA.

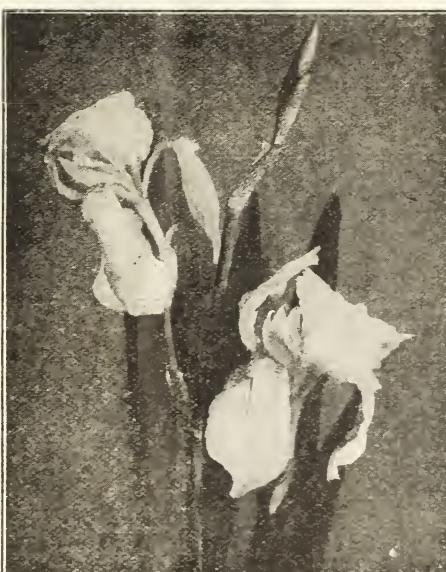

I will send you an order in the spring for trees. Those I secured from you in the spring of 1921 are all doing fine. I have told a great many people about your stock and I will give you an order in the spring, if nothing happens.—Garfield Butcher, 217 Spruce St.

King Humbert Canna

Parisiensis Iris

Neglecta Iris

brightest scarlet. Foliage light green.

HUNGARIA— $3\frac{1}{2}$ feet. The best pink Canna. Very compact and of a luxuriant growth. The leaves are bluish green, flower trusses of enormous size borne well above foliage. In color it suggests the Paul Neyron rose. 30c each, \$2.50 per 10.

JULIUS KOCK—3 feet. Foliage is dark green. Flowers composed of four broad, well rounded petals of the most brilliant blood red. 30c each; 10, \$2.50.

KING HUMBERT—4 feet. The grandest Canna ever offered. Large, heart shaped leaves of purple maiden brown over bronze. Dark ribs sharply defined, crowned with immense heads of orchid-like flowers. Color velvety orange-scarlet flecked carmine. 25c each; \$2.00 per 10.

WYOMING—Six feet. Soft, dark scarlet, with orange throat markings. Glossy green foliage. 25c each; \$2.00 per 10.

CANNAS

Neither public park nor home grounds is complete without its Canna beds. They are gross feeders, consequently require good rich soil. In preparing the Canna bed, spade the ground good and deep, mixing thoroughly into the soil enough well rotted stable manure to fill six inches of the whole bed. Set your plants 18 inches apart.

EUREKA—Four feet. A remarkable free flowering variety, and with its striking white flowers, which first appear cream, makes a very effective show along with a good scarlet like King Humbert. A robust grower, forming sturdy, shapely plants. 40c each; \$3.50 per 10.

FLORENCE VAUGHAN—Four feet. Flowers brilliant golden yellow, dotted with 25c each; \$2.00 per 10.

"Progress" Peonies

In order to produce the very finest blooms from our Peonies, the soil should be rich in plant food. Use well rotted barnyard manure. Probably the best plan is to mulch the plant during the winter with the manure then early in the spring give it a good hoeing, working in quite a lot of the manure into the loose soil.

Be sure the soil is well drained. Poor drainage will cause an acid soil and Peonies will not thrive in that sort. If planted in the lawn keep the sod cut away from the plant; don't let it crowd up and choke it. Peonies will reward you for fertilization and cultivation.

ANEMONEFLORA—Anemone type. A large clear pink, slightly tipped with silver. Selected Divisions, 60c each.

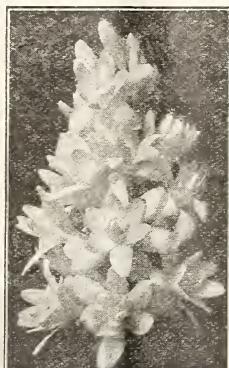

CHRYSANTHEMIFLORA—Flowers rich pink, slightly tipped with silver. Selected divisions, 60c each.

COURONNE D'OR—Large flat semi-rose type; is pure white with a ring of golden stamens around a tuft of center petals; tipped carmine. Selected divisions, 75c cents.

ROCHESTER—Rose type. Very late. Produces delicate salmon-pink flowers. Selected divisions, \$1.00 each.

DUCHESSE DE NEMOURS—Crown type. Early. A superb cup shaped, sulphur white flower, overlaid with green, that at a distance lights up the entire flower. Selected divisions, 60c each.

EDULIS SUPERBA—Always here for Decoration Day. A very beautiful bloom of clear mauve-pink, with silvery reflex, that

Tuberose

Couronne D'Or Peony

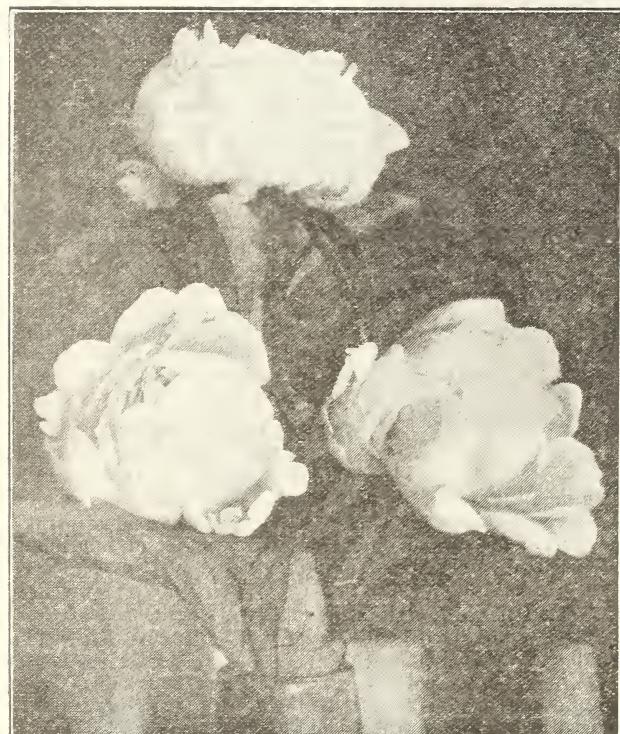

will measure from six to eight inches in diameter. A most noble flower for decorating that soldier's grave. Selected divisions, 50c each.

CALADIUM

CALADIUM (Elephant's Ear)—One of the most effective and easily grown foliage plants for the lawn and border. Select bulbs, 7 to 9 inches in circumference, 25c each.

DINSMORE'S SELECTED TUBEROSES

One of the best known and most easily grown summer flowering bulbs. Our Tuberoses are extra large and will produce long spikes filled with exquisitely perfumed, waxy white flowers, a single one of which will scent up the whole house. 10c each; per 10, 90c; per 100, \$7.00.

Rochester Peonies

FROM VALPARAISO, INDIANA.

I received my four Lombardy Poplars and am greatly pleased with them. They were planted immediately, so feel sure they will grow nicely. Thanking you for sending me such nice ones, as they are just what I wanted.—Mrs. John Cole, 158 Greenwich St.

FROM HOLLIDAY'S COVE, W. VA.

Both Mr. Campbell and myself are greatly pleased with the goods shipped us. The trees and shrubbery have attracted so much attention that I am sure you will receive several orders this fall and next spring from other parties. I also told Mr. S. H. A., Express Agent, Weirton, this fall about your fine stock and I note that he recently received an order from you. He told me a few days ago that it was the best nursery stock he had ever seen. I also gave Mr. Geo. H. Baldwin, Steubenville, Ohio, one of your catalogs and told him of your fine stock and if you have not already received an order from him, you will shortly.—R. E. Campbell.

FROM WOOSTER, OHIO.

Just a few lines to let you know that I received my fruit trees in fine condition and am very much pleased about them. They are surely fine stocky trees and hope to get another order in the future.—Urban Brumter, 734 Stibbs St.

"PROGRESS" ROSES

EVERBLOOMING BUSH ROSES

2-year-old, 65c each; 6 for \$3.25, except as noted: Los Angeles, \$1.50 each; 3 for \$4.25.

COLUMBIA—True peach-blown pink bloom, deepens in color as it opens. Double petals and long stems, almost thornless, makes it a very desirable rose.

FRANCIS SCOTT KEY—Bloom of crimson-scarlet with scattered black veins. Delicately perfumed. Large and handsome foliage, known as the American Rose of Patriotism.

FRAU KARL DRUSKI—Large pure white fragrant bloom, sometimes four inches in diameter. Hardy vigorous grower and a constant and abundant bloomer.

GENERAL McARTHUR—Richly perfumed crimson scarlet. Good stems for cutting.

GEORGE ARENDS—A grand new pink of satiny finish. A strong grower.

GEORGE C. WAND—Large orange vermillion bloom that is very fragrant and showy.

GEORGE DICKSON—Black crimson that is velvety and spicy fragrant.

GRUSS AN TEPLITZ—Rich scarlet shading to velvety crimson. A strong grower and profuse bloomer. Very fragrant. Young growth of a plum color.

JONKHEER J. L. MOCK—Deep pink center, outside petals silvery rose. Highly perfumed. Long stiff stems.

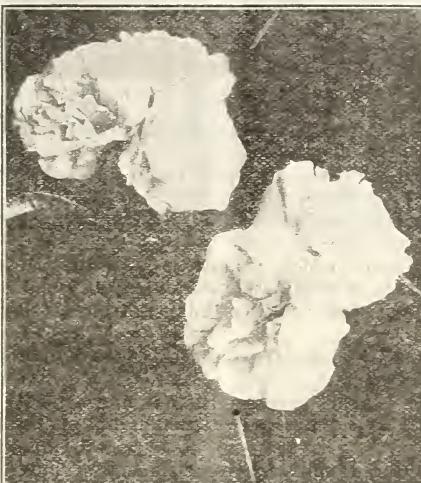

KAI SERIN AUGUSTA VICTORIA

—Creamy white long pointed buds and double bloom. A fragrance that is delicious.

PINK KILLARNEY—Bright carmine marbled in creamy white. Long buds and large heavy durable petals.

LADY HILLINGDON—Apricot-yellow bloom changing to orange color and very responsive to fertilizer and good cultivation.

LOS ANGELES—A flame pink as large as the Paul Neyron, stems as long as the American Beauty, shade of gold at the base of each petal. In richness and intensity of fragrance, it rivals the Marechal Neil. Its beauty of form, color and fragrance is main-

Ophelia

OPHELIA—White shaded with salmon flesh color and rose. A tinge of yellow at the base of the petals. Flowers are of lavish perfection and exquisitely perfumed.

RADIANCE—Bloom is a beautiful and perfect blending of carmine-rose with shades of opal and copper. Extra hardy, rapid grower and prolific bloomer.

RED LETTER DAY—Scarlet crimson cactus-like flowers. Roses of great charm and infinite grace.

RICHMOND—Scarlet crimson. Very fragrant and free bloomer.

WHITE MAMAN COCHET—Blooms snow white which sometimes faintly tinged with pale blush.

WHITE KILLARNEY—Pure white rose, an off-spring of the old Killarney. A free bloomer, pleasing fragrance, large buds and blooms, opens nicely.

WILLOMORE—Bloom rich shrimp pink, yellow at center and cream pink at base of petals. Large flowers and lustrous green foliage.

ANNA DE DIESBACH—Brilliant pink with long pointed buds. Extremely fragrant. Early and wonderful bearer of bloom.

BARON DE BONSTETTEN—Velvety crimson shading to darker colors. Hardy and free bloomer.

CAPTAIN HAYWARD—Carmine crimson. High growth. Distinct type of bloom and bush.

CLIO—Flesh color shaded in center to a rosy pink. Exquisite in color and delicious in fragrance. Hardy and free bloomer.

EUGENE FURST—Crimson shaded with cerise red. Intensely fragrant and flowers lasting in quality.

Gruss An Teplitz

tained from the incipient bud until the last petal drops. It is the most fragrant, most beautiful and most satisfactory rose ever originated or produced in America. \$1.50 each, 3 for \$4.25.

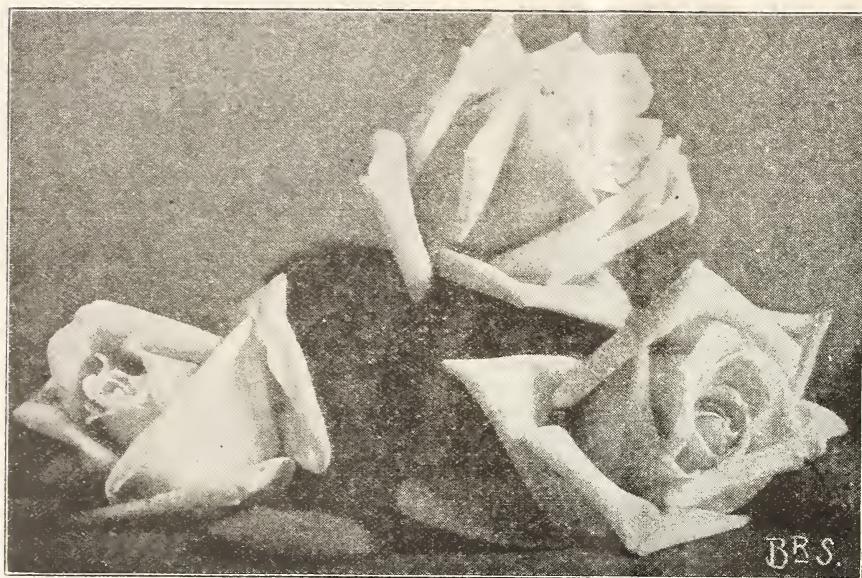

MAMAN COCHET—Rich coral pink shaded with rosy carmine. Delicately perfumed and exquisitely shaped.

MADAM CAROLINE TESTOUT—Brilliant and satiny rose, clear red in center. Petals are large and the buds extremely delicate in fragrance, shape, texture and color.

MOLLY SHARMAN-CRAWFORD—Pure white. Free bloomer, very fragrant and easy bearing.

MRS. AARON WARD—Small dainty golden orange blooms that fade to a light cream color.

MY MARYLAND—Brilliant live shades of pink. Handsome in bud and full bloom. Perfectly double and rich in fragrance.

Conrad Ferdinand Meyer

B.R.S.

GENERAL JACQUEMINOT—Brilliant shining crimson, world renown for hardiness. Strong grower, early and abundant bloomer.

J. B. CLARKE—Deep scarlet overlaid with crimson. Bloom is large and superbly constructed. Hardy and rapid grower with clean, glossy heavy foliage.

MAGNA CHARTA—Large flowers of a bright rose pink. Grows strong, blooms early and continuously.

MARCHAIL P. WILDER—Brilliant crimson which shades to scarlet. Free and perpetual bloomer. Smooth heavy petals, slightly reflexed on edge.

MRS. JOHN LAING—Flowers of soft clear pink. Satiny finish to the petals and loved for the delicate shades.

MRS. R. G. SHARMAN-CRAWFORD—Rosy pink of exquisite fragrance and texture. Its delicate tints fascinate all who see it.

PAUL NEYRON—Bright ruddy pink, 4 to 6 inches across. Blooms unceasingly from June to November on long, smooth and thornless stems. One of the finest roses grown.

PRINCE CAMILLE DE ROHAN—Blood red and maroon. Buds and half-opened flowers are darker than full bloom. The rose lover's favorite.

SOLEIL D'OR—Bloom of gold and orange yellow suffused with Nasturtium red. Hardy and strong grower, cross between Persian yellow and Antoine Ducher.

Baby Rambler

CONRAD FERDINAND MEYER

—Very large silvery pink bloom with the fragrance of a hybrid perpetual rose. Its double cup-shaped bloom attracts everybody.

NEW CENTURY—The newest and most interesting of the Rugosas. Bloom flesh pink with bright red center. Wonderful cherry red. Rose apples follow the bloom.

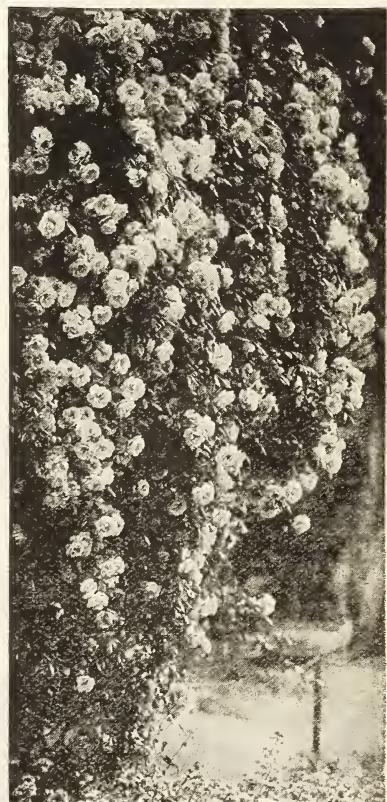

SIR THOMAS LIPTON—Snow white double Rugosa Rose of delightful fragrance. Strong, quick and vigorous grower to its complete height of four feet. Always loaded with blooms throughout the summer.

BABY RAMBLER OR POLY-ANTHA ROSES

Just the thing for planting in beds or in connection with shrubs in sunny exposures where some color is desired. 2-year-old plants, 65c each, 6 for \$3.25.

CRIMSON BABY RAMBLER—Compact bush covered with clusters of rich crimson-red flowers throughout the season. Perfectly hardy.

ELLEN POULSEN—Very sweetly scented dark brilliant pink, large full bloom. Constantly loaded with bloom.

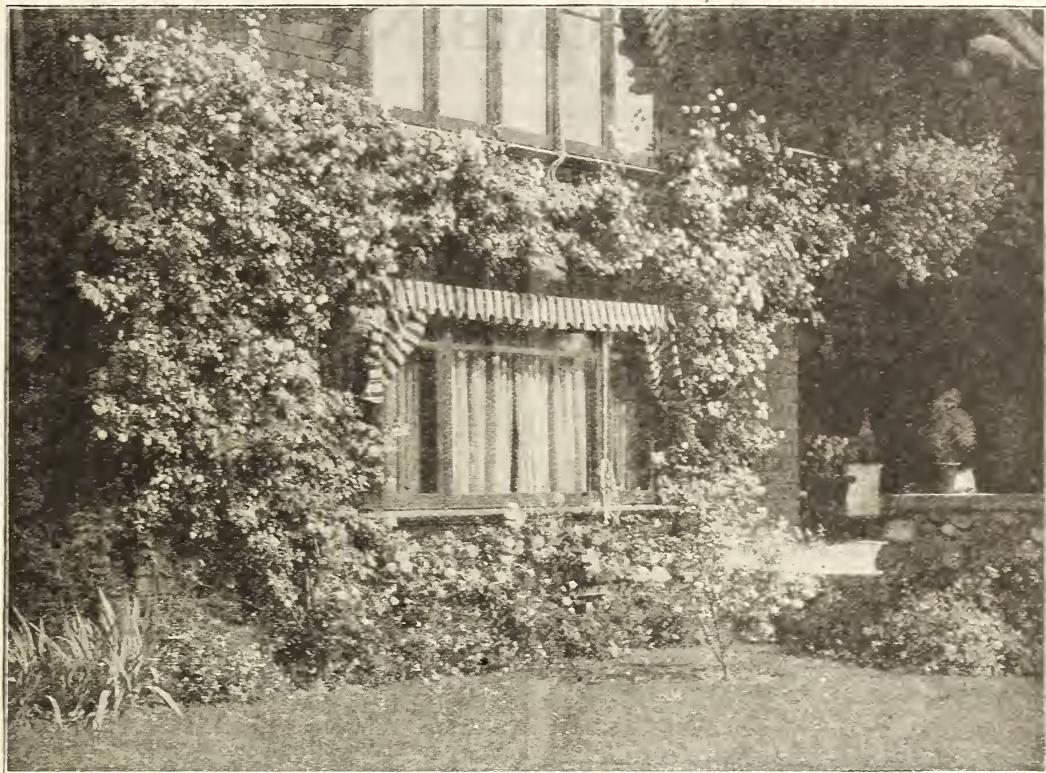

ULRICH BRUNNER—A large light red, cup-shaped bloom. Especially hardy and is free blooming through the full length of the season.

NEW RUGOSA AND HYBRID RUGOSA ROSES

These wonderful new varieties of free and constant bloomers and shining foliage are valuable for contrasts in landscape planting. Each bloom has its own mossy cup and when the bloom fades away, it leaves a tomato shaped rose-apple of yellow rose or purple shade that invites and holds attention through the remainder of the blooming season till winter's cold freezes these wonderful fruits. 2-year-old plants, 90c each, 3 for \$2.50.

Lady Gay

Dorothy Perkins Climbing Rose

BABY RAMBLER ROSES—Continued.

ERNA TESCHENDORFF—Best brilliant scarlet red and constant flowering. We recommend it as probably the best among the Baby Ramblers. Color of bloom does not fade like most other Roses.

GEORGE ELGER—Lovely golden yellow bloom, with glossy foliage, strong growth and free blooming makes it very attractive and desirable.

JEAN D'ARC—Pure white bloom that usually hangs in trusses of more than a hundred bloom and buds at a time and presents a striking appearance.

NEW CLIMBING ROSES

2-year-old plants, 65c each, 6 for \$3.25.

AMERICAN PILLAR—Large single flowers of carmine-rose with cream and yellow center.

CLIMBING AMERICAN BEAUTY—Magnificent red flowers like the bush rose of the same name.

DR. VAN FLEET—Delicate flesh white exquisitely shaped buds, flowers in large cutting clusters.

SILVER MOON—Pure white semi-double with yellow stamens, bloom very large and hanging in almost solid clusters.

GARDENIA—Cream colored bloom following bright yellow buds. Very hardy and rapid grower.

GOLD FINCH—Bloom a light lemon color following darker yellow beautiful buds. Hardy and wonderful bloomer.

FLOWER OF FAIRFIELD—Continuous bloom of dark-red flowers. A wonderful rose.

GRUSS AN TEPLITZ—Rich scarlet shading to a velvety crimson. Fragrant, free bloomer and rapid grower.

VELCHENBLAU—Semi-double steel-blue flower. Has large clusters of showy yellow stamens, combining with the blue petals, makes it novel and attractive.

THE GRAND OLD CLIMBING ROSES

2-year-old plants, 50c each; 6 for \$2.50.

DOROTHY PERKINS—Shell pink blooms in great clusters lasting a long time without fading. Sweet scented. Leathery foliage of deep green color.

LADY GAY—Cherry pink bloom that fades to white. Wonderfully profuse bloomer.

EXCELSA—Double blood red bloom in large clusters that last longer than the bloom of most climbers.

BALTIMORE BELLE—Double blush white in great clusters that makes it one of the valuable climbers.

HIAWATHA—Deep ruby crimson with white eye. Large clusters of small single bloom. Valuable in contrast with other colors and larger bloom.

SEVEN SISTERS—Rich crimson in heavy clusters. The old favorite with everybody.

PAUL'S SCARLET CLIMBER

A real Everblooming Climbing Rose for the veranda or pergola. Blooms are semi-double crimson scarlet and show their color till the summer season is at an end. No rose collection or lawn planting may be regarded as complete unless it has some of these climbers. A wonderful rose that we cannot recommend too highly. 2-year-old plants, 90c each, 3 for \$2.50.

TREE ROSES

Hardy, fine and dependable blooming varieties budded on stems so as to make trees for formal garden work and special plantings, along property borders and as outlines for fixed areas. These Rose Trees will prove themselves interesting and valuable additions to any rose garden or general landscape planting. 5 to 6 feet high, \$2 each, 3 for \$5.50.

PAUL NEYRON—Great ruddy-pink bloom on long thornless stems. Its bloom is certain from June to November. Sometimes six inches across.

ULRICH BRUNNER—Large light-red cup-shaped bloom. Long slender buds on good stems for cutting through the whole season.

GENERAL JACQUEMINOT—Dark red double bloom. Spicily fragrant and exquisite buds.

KARL DRUSKI—The white American Beauty that blooms from June till the coming of snows. Waxy, paper-white petals make it a beauty that is charming.

SPRAYING

The necessity of spraying is acknowledged by all authorities as being one of the requirements of successful fruit growing. An enormous amount of money has been spent during the last few years in every state in the Union for the study of sprays and mixtures, and the value of each. Spraying not only insures better fruit, but more of it, greatly increasing the quality and value.

TABLE FOR SPRAYING

	1st Application	2nd Application	3rd Application	4th Application
Apple -----	Before buds start, copper sulphate solution and arsenate.	After the blossoms have formed but before they open.	Within a week after the blossoms fall, bordeaux mixture and arsenate.	Two weeks later, bordeaux mixture and arsenate.
Cherry -----	Before buds open, bordeaux.	When the fruit has set, bordeaux.	Two weeks later, bordeaux or kerosene.	2 weeks later if necessary, bordeaux and arsenate.
Pear -----	Before buds open, bordeaux.	When the blossoms have formed, but before they open, bordeaux or kerosene.	Within a week after the blossoms fall, bordeaux or kerosene.	Repeat in 2 weeks if necessary, bordeaux mixture or kerosene.
Plum -----	Before buds open, bordeaux Black Knots should be cut	As soon as the blossoms fall, bordeaux. off and burned whenever found.	Two weeks later, bordeaux or paris green.	Repeat at intervals of two weeks if necessary.
Peach -----	Very early, before April 1, copper sulphate.	Two weeks later, bordeaux.	When the fruit is set, copper sulphate.	Repeat in 2 weeks if rot appears, copper sulphate.
Quince -----	Before buds open, bordeaux	When fruit has set.	Two weeks later.	Three weeks later.
Raspberry, Blackberry, etc.	Before buds open, bordeaux.	When new canes are a foot high, bordeaux.	Two weeks later, bordeaux.	
Grape -----	Before buds open, copper sulphate and paris green.	When the leaves are half grown, paris green.	When the fruit is set, paris green.	Repeat in three weeks if necessary, paris green.
Gooseberry -----	As leaves open, bordeaux.	Repeating in two weeks, bordeaux.	Two weeks later, bordeaux.	Repeat in two weeks if necessary, bordeaux.
Currant -----	As soon as worms are found on lower and inner leaves, bordeaux.	If worms reappear, repeat in two weeks, bordeaux.	Repeat in four weeks if necessary, hellebore.	After fruit is picked bordeaux freely.
Strawberry -----	Just as the blossoms open,	After fruit is set, bordeaux.	As soon as berries are harvested, bordeaux.	

BORDEAUX MIXTURE

Copper sulphate -----	6 pounds
Quicklime -----	4 pounds
Water -----	45 gallons

To destroy leaf-eating insects, add four ounces of paris green. For peach, use three pounds each of copper sulphate and lime, and three ounces of paris green on account of tenderness.

We recommend crude petroleum, 20 to 25 per cent, with water, for apples, pears, plums, etc., and whaleoil soap, full strength and quantity, to peaches.

KEROSENE EMULSION

Hard soap -----	$\frac{1}{2}$ pound
Boiling water -----	1 gallon
Kerosene -----	2 gallons

ARSENATE OF LEAD

Arsenate of Lead, 1 lb.	Water, 150 gallons.
-------------------------	---------------------

AMMONIACAL COPPER CARBONATE

Copper Carbonate, 5 ounces.	Ammonia, 2 quarts.
Water, 50 gallons.	

The Copper Carbonate is best dissolved in large bottles, where it will keep indefinitely, as it should be diluted with water as required. For the same purpose as bordeaux.

COPPER SULPHATE SOLUTION

Copper Sulphate, 1 pound. Water, 25 gallons. This should be used only before the foliage appears. It is easily applied and acts as a general germicide and disinfectant. In simple solution copper sulphate is very injurious to foliage. When lime is added, as in making bordeaux mixture, its corrosive action is neutralized and injury to the foliage is prevented. It adheres to the foliage better by the agency of lime.

TOBACCO

Boil Tobacco stems and use at the rate of two gallons to each pound of stems, for sucking insects.

SUITABLE DISTANCES FOR PLANTING

Apples, Standard -----	30 to 40 feet.
Apples, Dwarf -----	8 to 10 feet.
Pears, Standard -----	18 to 20 feet.
Pears, Dwarf -----	10 feet.
Peaches -----	16 to 18 feet.
Nectarines and Apricots -----	16 to 18 feet.
Cherries, Sweet -----	18 to 20 feet.
Cherries, Sour -----	15 to 18 feet.
Plums -----	16 to 20 feet.
Quinces -----	10 to 12 feet.
Grapes -----	8 to 10 feet.
Currents -----	3 to 4 feet.
Gooseberries -----	3 to 4 feet.
Raspberries, Red -----	3 to 4 feet.
Raspberries, Black -----	3 to 5 feet.
Blackberries -----	5 to 7 feet.
Strawberries, in rows -----	1 by 3½ feet.
Strawberries, in beds -----	1½ by 1½ feet.
Asparagus, in beds -----	1 by 1½ feet.
Asparagus, in field -----	1 by 3½ feet.

NUMBER OF TREES OR PLANTS TO ACRE

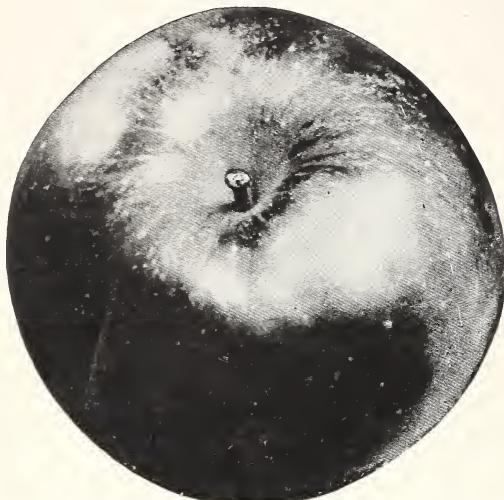

1 foot apart each way	43,560
2 feet , , , ,	10,890
3 feet , , , ,	4,840
4 feet , , , ,	2,722
5 feet , , , ,	1,742
6 feet , , , ,	1,210
7 feet , , , ,	888
8 feet , , , ,	680
9 feet , , , ,	537
10 feet , , , ,	435
12 feet , , , ,	302
14 feet , , , ,	222
15 feet , , , ,	193
16 feet , , , ,	170
18 feet , , , ,	134
20 feet , , , ,	108
25 feet , , , ,	69
30 feet , , , ,	48
35 feet , , , ,	35
40 feet , , , ,	27

RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number to the acre.
